

# Aberdeen Standard SICAV I - Select Euro High Yield Bond Fund

A Acc EUR

31 January 2021

## Important Information

- The Fund invests in Euro denominated sub-investment grade fixed interest securities issued by corporations or government related bodies.
- The Fund's underlying investments are subject to interest rate risk and credit risk. Interest rate fluctuations affect the capital value of investments. Credit risk reflects the ability of a bond issuer to meet its obligations.
- The Fund has a significant position in high-yielding bonds, which means a higher risk to investor's capital and income.
- The Fund's exposure to a specific regional market increases potential volatility.
- The Fund's net derivative exposure may be up to 50% of the Fund's net asset value and subject to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk.
- Investment in this Fund may involve a high degree of risk and may not be suitable for all investors. It is possible that the entire value of the Investment could be lost.
- Investors are responsible for their investment decisions and should ensure that the intermediary has advised on Fund's suitability and consistency with their investment objective. If in doubt, please seek independent financial and professional advice.
- Investors should not invest in this Fund based solely on this document and should read the relevant offering documents (particularly the investment policies and risk factors) for more details before investing.

## Objective

To achieve long-term total return by investing at least two-thirds of the Fund's assets in fixed interest securities which are Sub-Investment Grade and denominated in Euro and issued by corporations or government related bodies.

Source: Aberdeen Standard Investments, total return, Gross of Fees, BPSS, Datastream, USD, as of 31/12/2020. Please note the risk analytics figures are calculated on gross returns whereas the performance figures are based on net asset value (NAV) returns. In addition, the risk analytics figures lag the performance figures by one month. It should be noted that the figures provided regarding risk would be adjusted if fund fees and expenses were included.^ 3 and 5 year annualised. Beta is a measure of the volatility of a portfolio in comparison to a benchmark index. Fund volatility measures historical volatility. Information ratio measures the portfolio returns beyond the returns of a benchmark, usually an index, compared to the volatility of those returns. R-squared measures the percentage of a fund or security's movements that can be explained by movements in a benchmark index. Sharpe ratio measures risk-adjusted performance. Tracking error measures the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Product Key Facts Statement and Prospectus which are available on our website [www.aberdeenstandard.com.hk](http://www.aberdeenstandard.com.hk). The Prospectus also contains a glossary of key terms used in this document.

<sup>1</sup>Yield to Maturity as at 31/01/2021 is the yield that would be realised on a bond or other debt instrument if the security was held until the maturity date.

<sup>2</sup>These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

<sup>3</sup>The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.25% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.
