

IMPORTANT: This letter is important and requires your immediate attention. If you have any questions about the content of this letter, you should seek independent professional advice. Schroder Investment Management (Europe) S.A., as the Management Company to Schroder International Selection Fund, accepts full responsibility for the accuracy of the information contained in this letter and confirms, having made all reasonable enquiries, that to the best of its knowledge and belief there are no other facts the omission of which would make any statement misleading.

25 April 2024

Dear Shareholder,

Schroder International Selection Fund (the "Company") - changes to the distribution policy of certain share classes (the "Share Classes")

We are writing to inform you that following a recent review, we have decided to change the distribution policy for some of the Share Classes of the following sub-funds: **Asian Bond Total Return, EURO Corporate Bond** and **Global Target Return** (together, the "**Funds**"). The changes to the distribution policy for each of the affected Share Classes are listed in the appendix of this letter. The distribution frequency of the Share Classes will not change.

These changes will come into effect for the monthly distributions due to be paid on **11 June 2024** and the semi-annual distributions due to be paid on **10 July 2024** based on the number of shares held by shareholders in the relevant Share Classes on the record date **29 May 2024** for the monthly distributions and **26 June 2024** for the semi-annual distributions and will apply to all distributions going forward.

Background and rationale

We periodically review the distribution Share Classes and reserve the right to make changes. For example, if the investment income after expenses is higher than the target distribution, we may declare a higher amount to be distributed. Equally, we may deem it is appropriate to declare a dividend lower than the target distribution.

The Share Classes fees will remain unchanged and the costs of making these changes including regulatory and shareholder communication costs will be borne by Schroder Investment Management (Europe) S.A. which is the Company's management company.

Please note that distributions may be paid out of capital and reduce the relevant Fund's net asset value. Please refer to the Hong Kong offering documents of the Company for the relevant risks relating to distributions paid out of capital. The information on the dividend compositions of the Share Classes will continue to be available from Schroder Investment Management (Hong Kong)

Limited, i.e. the Hong Kong Representative of the Company, on request and on the Schroders' Internet site (www.schroders.com.hk¹).

Save as disclosed above, (i) all other key features of the Funds (including fees chargeable in respect of the Funds as stated in the Hong Kong offering documents) will remain the same; (ii) there will be no change to the risks applicable to the Funds; and (iii) there will also be no material change in the operation and/or manner in which the Funds are being managed as a result of the changes set out above. The changes are not expected to materially prejudice the rights or interests of existing investors.

The Hong Kong offering documents of the Company will be revised to reflect the relevant changes and will be available free of charge at www.schroders.com.hk² or upon request from the Hong Kong Representative of the Company, Schroder Investment Management (Hong Kong) Limited.

Redeeming or switching your shares to another Schroders fund

We hope that you will choose to remain invested in the Funds following these changes, but if you do wish to redeem your holding in the Funds or to switch into another of the Company's sub-funds authorized by the Securities and Futures Commission ("SFC")³ or share classes of the Funds before the changes become effective you may do so at any time up to and including the dealing cut-off at 5:00 p.m. Hong Kong time on **29 May 2024** for the monthly distributions and **26 June 2024** for the semi-annual distributions.

Please ensure that your redemption or switch instruction reaches the Hong Kong Representative or the Company's transfer agent's delegate, The Hongkong and Shanghai Banking Corporation Limited (the "**Delegate**") before this deadline. We or the Delegate will execute your redemption or switch instructions in accordance with the provisions of the Company's Hong Kong offering documents, free of charge, although in some countries local paying agents, correspondent banks or similar agents might charge transaction fees. Local intermediaries might also have a local dealing cut-off which is earlier than that described above, so please check with them to ensure that your instructions reach the Hong Kong Representative or the Delegate before the dealing cut-off at 5:00 p.m. Hong Kong time on **29 May 2024** for the monthly distributions and **26 June 2024** for the semi-annual distributions.

We advise shareholders to read the Funds' latest product key facts statements for the relevant Share Class and the Company's offering documents, which are available at www.schroders.com.hk⁴. If you have any questions or would like more information, please contact your usual professional advisor or the Hong Kong Representative at Level 33, Two Pacific Place, 88 Queensway, Hong Kong or calling the Schroders Investor Hotline on (+852) 2869 6968.

Yours faithfully,

The Board of Directors

Appendix

List of Share Classes with changing distribution policies in the Funds:

Asian Bond Total Return

| Share Class | Share class currency | Current distribution rate per annum | Future distribution rate per annum |
|---------------|----------------------|-------------------------------------|------------------------------------|
| A HKD Dis MF | HKD | 5.5% per annum paid monthly | 6.5% per annum paid monthly |
| A USD Dis MF | USD | 5.5% per annum paid monthly | 6.5% per annum paid monthly |
| A1 USD Dis MF | USD | 5.5% per annum paid monthly | 6.5% per annum paid monthly |

EURO Corporate Bond

| Share Class | Share class currency | Current distribution rate per annum | Future distribution rate per annum |
|---------------|----------------------|-------------------------------------|------------------------------------|
| A1 EUR Dis SF | EUR | 2.5% per annum paid semi-annually | 3.0% per annum paid semi-annually |

Global Target Return

| Share Class | Share class currency | Current distribution rate per annum | Future distribution rate per annum |
|-----------------------|----------------------|--|--|
| A USD Dis MF | USD | 5.0% per annum paid monthly | 7.0% per annum paid monthly |
| A AUD Hedged Dis MFC* | AUD Hedged | 5.0% per annum paid monthly with currency carry* | 7.0% per annum paid monthly with currency carry* |
| A EUR Hedged Dis MF | EUR Hedged | 5.0% per annum paid monthly | 7.0% per annum paid monthly |
| A HKD Dis MF | HKD | 5.0% per annum paid monthly | 7.0% per annum paid monthly |

| Share Class | Share class currency | Current distribution rate per annum | Future distribution rate per annum |
|-----------------------|----------------------|--|--|
| A RMB Hedged Dis MFC* | RMB Hedged | 5.0% per annum paid monthly with currency carry* | 7.0% per annum paid monthly with currency carry* |

* This refers to the premium or discount that may apply to the distribution. Distributions may include a premium when the interest rate of a currency hedged share class is higher than the Fund's base currency interest rate. Consequently when the interest rate of a currency hedged share class is lower than the Fund's base currency interest rate, the dividend may be discounted. The level of premium or discount is determined by differences in interest rates and is not part of the Fund's investment objective or investment policy.

According to the provisions of the Company's prospectus, distribution Share Classes may be issued with different distribution frequencies or attributes which are designated as follows:

Distribution frequency: M = monthly, Q = quarterly, S = semi-annual, A = annual

Distribution type: F = fixed or V = variable

Issuer: Schroder Investment Management (Europe) S.A.

April 2024

| Dealing frequency: | Daily | | | |
| Base currency: | USD | | | |
| Dividend policy: | <p>A, A1 and D Accumulation share classes – Dividend will not be distributed but will be reinvested into the fund.</p> <p>A, A1 and D Distribution share classes – The board of directors generally has discretion as to whether or not to make any distribution save for the Distribution share classes with fixed dividend policy which are subject to the disclosures below. The distribution frequency is indicated in the share class designation as follows:</p> <p>M = monthly, Q = quarterly, S = semi-annual, A = annual</p> <p>Distributions may be paid out of capital and reduce the fund's net asset value.</p> <p>In respect of Distribution share classes with fixed dividend policy, the distribution amount per share is calculated as follows: dividend rate ÷ distribution frequency over a year × net asset value per share on the record date. Details of the Distribution share classes with fixed dividend policy are set out below:</p> | | | |

| Fixed Distribution Share Class | Currency | Distribution Frequency over a year | Dividend Rate |
|--------------------------------|----------|------------------------------------|-----------------|
| Class A USD Dis MF | USD | Monthly (12) | 5.50% per annum |
| Class A1 USD Dis MF | USD | Monthly (12) | 5.50% per annum |
| Class A HKD Dis MF | HKD | Monthly (12) | 5.50% per annum |

Investors should note that a positive distribution yield does not imply a positive return. The board of directors will periodically review fixed distribution share classes and reserves the right to make changes.

Financial year end of this fund: 31 December

Minimum investment: A, A1 and D share classes: Initial – EUR1,000 or USD1,000 (or equivalent); Subsequent investment – EUR1,000 or USD1,000 (or equivalent)

* The ongoing charges figure is based on the expenses for the year ended 31 December 2023. This figure may vary from year to year.

What is this product?

This is a sub-fund of Schroder International Selection Fund, a mutual fund domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Objectives and investment strategy

Investment Objective

The fund aims to provide capital growth and income by investing in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies in Asia.

Investment Policy

The fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities, derivatives related to these securities and currencies. The fixed and floating rate securities are issued by governments, government agencies, supra-nationals and companies in Asia. For the purposes of this fund, Asia includes the following west Asian countries: Bahrain, Israel, Lebanon, Oman, Qatar, Saudi Arabia, Turkey and United Arab Emirates.

The fund is designed to participate in rising markets whilst aiming to mitigate losses in falling markets through the use of derivatives. The mitigation of losses cannot be guaranteed.

The fund may invest up to 30% of its assets in mainland China through the Qualified Foreign Investor ("QFI") scheme or regulated markets (including the CIBM via Bond Connect or CIBM Direct).

The fund may not invest:

- (a) more than 10% of its net asset value in Urban Investment Bonds (城投債), which means debt instruments issued by local government financing vehicles ("LGFVs") and traded on the PRC exchange-traded bond markets and interbank bond market. These LGFVs are separate legal entities established by local governments and/or their affiliates to raise financing for public welfare investment or infrastructure projects;
- (b) more than 5% of its net asset value in asset-backed securities (including mortgage-backed securities and asset-backed commercial papers); and
- (c) in structured deposits or structured products.

Schroder International Selection Fund - Asian Bond Total Return

The fund may invest up to 50% of its assets in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds).

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in Appendix I of the Prospectus). The fund may (exceptionally) hold 100% of its assets in money market investments or cash. This will be limited to a maximum of six months (otherwise, subject to applicable regulatory approval and requirements, the fund will be liquidated).

The fund does not have explicit restrictions on the minimum credit ratings of debt securities it may hold through QFI. The aggregate investment in debt securities with a credit rating below investment grade (i.e. rated below BBB- by any internationally recognised credit rating agency, such as Standard & Poor's, Moody's or Fitch, or rated AA- or below by any PRC domestic credit rating agency; whenever different ratings are assigned by different credit rating agencies, the lowest credit ratings assigned to the security will be adopted by the fund) or unrated debt securities through QFI will not exceed 30% of the fund's net asset value. The investment manager will assess credit risks of fixed income instruments based on quantitative and qualitative fundamentals, including without limitation the issuer's leverage, operating margin, return on capital, interest coverage, operating cash flows, industry outlook, firm's competitive position and corporate governance issue. For this purpose, if the relevant security does not itself have a credit rating, then reference can be made to the credit rating of the issuer of the security. If both the security and the relevant issuer are not rated, then the security will be classified as unrated.

The fund may invest less than 30% of its net asset value in debt instruments issued by financial institutions with loss-absorption features (e.g. contingent convertible bonds, Additional Tier 1, Tier 1 and Tier 2 capital notes, senior non-preferred notes, senior and subordinated bonds issued by holding companies of a financial institution). These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger events.

The fund may invest up to 10% of its net asset value in insurance-linked securities ("ILS"), such as catastrophe bonds, issued outside Hong Kong and/or any ILS-related products, such as derivatives or structured products whose returns are linked to the performance of any ILS and collective investment schemes whose investment objective or principal investment strategy is investing in ILS. For the avoidance of doubt, the fund will not invest in ILS issued in Hong Kong and their repackaged products and derivatives.

The fund is not subject to any limitation on the portion of its net asset value that may be invested in any country in Asia (excluding Japan) (including emerging market countries) or sector.

Under exceptional circumstances (e.g. market crash or major crisis), the fund may be invested temporarily up to 100% of its net asset value in liquid assets such as bank deposits, certificates of deposit, commercial paper and treasury bills for cash flow management.

As part of its primary objective, the fund also has the flexibility to implement long and short active currency positions via derivatives such as currency forwards. Long and short active currency positions implemented by the fund can be uncorrelated to the underlying assets of the fund. The fund may use derivatives such as currency forwards, options on currency forwards and spots to hedge out any unwanted currency risk and/or to capture potential outperformance of a particular currency versus another.

The fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. Where the fund uses total return swaps, the underlying consists of instruments in which the fund may invest according to its investment objective and investment policy. In particular, the aim is to use total return swaps on a temporary basis in market conditions including but not limited to periods of slow economic growth and falling interest rates, and

where the investment manager's view is that sovereign spread premiums will compress. The gross exposure of total return swaps will not exceed 20% and is expected to remain within the range of 0% to 5% of the net asset value. In certain circumstances this proportion may be higher.

Derivatives may be employed for instance to generate additional income from exposure to credit risk in purchasing or selling protection through credit default swaps, adjusting the fund's duration through the tactical use of interest related derivatives, generating additional income through inflation or volatility linked derivatives or increasing its currency exposure through the use of currency related derivatives. Derivatives could also be employed to create synthetic instruments. Such derivatives include over-the-counter and/or exchange traded options, futures, warrants, swaps, forward contracts and/or a combination of the above.

Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against 50% Markit iBoxx Asian Local Currency index + 50% JP Morgan Asian Credit index. The comparator benchmark is only included for performance comparison purposes and does not determine how the investment manager invests the fund's assets. The fund's investment universe is expected to overlap materially with the components of the comparator benchmark.

Use of derivatives / investment in derivatives

The fund's net derivative exposure may be up to 50% of the fund's net asset value.

What are the key risks?

Investment involves risk. Please refer to the offering document for details including the risk factors.

1. General investment risk

The fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the fund may suffer losses. There is no guarantee of the repayment of principal.

2. Risk relating to investment in debt securities

- **Credit and counterparty risk**— Investment in debt securities is subject to the credit/default risk of the issuer which may also adversely affect the settlement of the securities.
- **Interest rate risks**— Investment in the fund is subject to interest rate risk. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise.
- **Below investment grade and unrated debt securities**— Investments in fixed income securities below investment grade or unrated are generally subject to higher degree of counterparty risk, credit risk, volatility risk, liquidity risk and risk of loss of principal and interest than higher rated securities.
- **Credit ratings risk**— Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.
- **Risks relating to PRC credit rating agencies** – The credit appraisal system in the PRC and the rating methodologies employed in the PRC may be different from those employed in other markets. Credit ratings given by PRC rating agencies may therefore not be directly comparable with those given by other international rating agencies.
- **Credit downgrading risk**— The credit rating of debt securities or their issuers may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may not dispose of such securities immediately and the fund may therefore be subject to additional risk of loss.
- **Liquidity and volatility risk**— Securities not listed or rated or actively traded may have low liquidity and higher volatility. The prices of such securities may be subject to fluctuations. The bid and offer

spread of their price may be high and the fund may therefore incur significant trading costs and may even suffer losses when selling such instruments.

- **Valuation risk**— Valuation of the fund's investment may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

3. Emerging and less developed markets

The fund may invest in emerging and less developed markets. Investing in emerging and less developed markets is subject to greater risks than investing in securities of developed countries such as ownership and custody risks, political and economic risks, market and settlement risks, liquidity and volatility risk, legal and regulatory risks, execution and counterparty risk, and currency risk, which may adversely affect the net asset value per share of the fund and investors may as a result suffer losses.

4. Risks related to investment in the People's Republic of China (the "PRC")

Investing in the securities market in the PRC is subject to the risks specific to the PRC market including change in political, social or economic policy risk, liquidity and volatility risk, currency and exchange risk.

- **Change in political, social or economic policy risk**— The investment will be sensitive to any significant change in political, social or economic policy in the PRC which may adversely affect the capital growth and thus the fund performance.
- **Legal and regulatory risk**— The regulatory and legal framework for capital markets and joint stock companies in the PRC may not be as well developed as those of developed countries. PRC companies are required to follow the PRC accounting standards and practice which may deviate significantly from international accounting standards. The settlement and clearing systems of the Chinese securities markets may not be well tested and may be subject to increased risks of error or inefficiency. Securities exchanges in the PRC typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the fund.
- **Liquidity and volatility risk**— Compared with the choice available in other markets, there is a low level of liquidity in the securities market in the PRC. This could potentially lead to severe price volatility.
- **Currency and exchange risk**— The PRC government's control of currency conversion and exchange rates may adversely affect the operations and financial results of the companies invested in by the fund.
- **PRC taxation consideration**— The fund investing in securities issued by companies resident in the PRC are subject to dividend withholding tax but are not currently subject to capital gains tax in the PRC. The tax laws, regulations and practice in the PRC are inherently uncertain and liable to change without prior notice. They may also be changed with retrospective effect. The fund does not currently make any provision for Chinese capital gains tax. If appropriate, a provision may be introduced for the fund to cover capital gains tax, withholding taxes or other taxes. Consequently, investors may be advantaged or disadvantaged depending upon the final rules.

5. QFI Risks

- **QFI status:** Investors should note that QFI status could be suspended or revoked/terminated or otherwise invalidated, which may have an adverse effect on the fund's performance as the fund may be required to dispose of its securities holdings and /or may be prohibited from trading of relevant securities and repatriation of the fund's monies. The funds may suffer substantial losses. There can be no assurance that the investment manager (as QFI Holder) will continue to maintain its QFI status which may result in a rejection of application for subscriptions or a suspension of dealings of the fund. Under the QFI regimes, the QFI Holder and the fund, which uses the investment manager's status as a QFI, are not subject to quota restrictions. There is no assurance, however, that PRC rules and regulations will not change or that quota restrictions will not be imposed in the future.

- Risks regarding application of QFI rules: The fund is subject to the QFI rules and application of such rules may depend on the interpretation given by the relevant Chinese authorities. The fund's ability to make the relevant investments or to fully implement or pursue its investment objective and strategy is subject to the applicable laws, rules and regulations (including restrictions on investments and repatriation of principal and profits) in the PRC, which are subject to change. Any changes to the rules, which may have potential retrospective effect, may have an adverse impact on investors' investment in the fund.
- Repatriation and liquidity risks: There is no assurance that PRC rules and regulations will not change or that lock-up periods or repatriation restrictions will not be imposed in the future. Any restrictions on repatriation of the invested capital and net profits may impact on the fund's ability to meet redemption requests.
- Cash deposited with China Custodian: If the China Custodian defaults, the fund may suffer substantial losses as the cash deposited in the cash accounts are not segregated from that of other creditors of the China Custodian and therefore become an unsecured debt owing from the China Custodian to the fund. The fund may face difficulty in recovering such debt and therefore suffer losses.
- PRC brokerage risk: The fund's execution or settlement of transactions may be adversely affected if the PRC broker defaults/bankrupts. The fund may therefore suffer losses.

6. Risks associated with the CIBM via CIBM Direct and/or Bond Connect

Investing in the CIBM via CIBM Direct and/or Bond Connect is subject to regulatory risks and various risks such as volatility risk, liquidity risk, settlement and counterparty risk as well as other risk factors typically applicable to debt securities. The relevant rules and regulations on investment in the CIBM via CIBM Direct and/or Bond Connect are subject to change which may have potential retrospective effect. In the event that the relevant mainland Chinese authorities suspend account opening or trading on the CIBM, the fund's ability to invest in the CIBM will be adversely affected. In such event, the fund's ability to achieve its investment objective will be negatively affected.

7. Sovereign debt risk

Investment in sovereign debt obligations issued or guaranteed by governments or their agencies of certain developing countries and certain developed countries may expose the fund to political, social and economic risks. A government entity's willingness or ability to repay principal and interest due in a timely manner may be affected by various factors. In the event that a government entity defaults on its sovereign debt, holders of sovereign debt, including the fund, may be requested to participate in the rescheduling of such debt and to extend further loans to the relevant government entity. The fund may suffer significant losses in such events.

8. Risk of implementing active currency positions

The investment manager has the flexibility to actively manage currency positions which it considers will achieve the investment objective of the fund. However no guarantee or representation is made that such investment strategy/technique will be successful.

When implementing active currency positions, the fund may enter into currency forwards or other instruments with the aim of protecting the value of the assets of the fund against untoward foreign exchange risks and actively managing currency positions of the fund. Currency forwards or other instruments do not eliminate fluctuations in the prices of the fund's securities or in foreign exchange rates, or prevent loss if the prices of these securities decline. Performance may be strongly influenced by movements in foreign exchange rates because currency positions held by the fund may not correspond with securities positions held. In such circumstances, the fund's assets may be exposed to the losses which may in turn adversely affect the net asset value per share of the fund and investors may suffer losses.

9. Derivatives

The fund may use derivatives to meet its specific investment objective. There is no guarantee that the performance of derivatives will result in a positive effect for the fund. The leverage element/component of derivatives can result in a loss significantly greater than the amount invested in the derivatives by the fund. Derivative exposure may lead to a high risk of significant capital loss. Risks associated with derivatives include:

- **Credit risk and Counterparty risk**— The fund will be subject to the risk of the inability of any counterparty through or with which the fund conducts the derivative transactions to perform its obligations, whether due to insolvency, bankruptcy or other causes. Long and short positions gained through total return swaps may increase exposure to credit-related risk.
- **Liquidity risk**— There may be possible absence of a liquid secondary market for any particular derivatives at any time. The fund may be unable to sell illiquid derivatives at an advantageous time or price and results in a reduction of returns.
- **Valuation risk**— The fund is subject to the risk of mispricing or improper valuation of derivatives.
- **Interest rate risk**— There may be interest rate risk when swaps (such as total return swaps) involve floating rate payments.
- **Volatility risk**— The fund is subject to the risk of higher volatility of the returns as derivatives usually have a leverage component.
- **Over-the-counter ("OTC") transaction risks**— Derivatives traded in OTC markets may be more volatile and less liquid. Its prices may include an undisclosed dealer mark-up which a fund may pay as part of the purchase price.
- **Hedging risk**— There is no guarantee that the desired hedging instruments will be available or hedging techniques will achieve their desired result. In adverse situations, the use of hedging instruments may become ineffective in hedging and the fund may suffer significant losses.

10. Concentrated geographical locations

The fund investing in concentrated geographical locations may be subject to a higher level of risks comparing to a fund investing in a more diversified portfolio/strategy. The value of the fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the relevant geographical locations.

11. Risks relating to distributions

- For distribution share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital; capital growth will be reduced and in periods of low growth capital erosion may occur.
- Distribution share classes with a fixed dividend policy will distribute the dividends based on a fixed amount or fixed percentage of the net asset value per share. This may result in share classes with fixed distributions either paying out both income and capital in distribution payments, or not substantially distributing all the investment income which a share class has earned.
- Investments in distribution share classes with fixed dividend policy are not an alternative to a savings account or fixed-interest paying investment. The percentage of distributions paid by distribution share classes with fixed dividend policy is unrelated to expected or past income or returns of these share classes or the fund. The distribution can thus be higher or lower than the income and return that were effectively realised.
- Distribution share classes with fixed dividend policy will continue to distribute in periods that the fund has negative returns or is making losses, which further reduces the net asset value of the distribution Share Classes with fixed dividend policy. In extreme circumstances, investors may not be able to get back the original investment amount.

- Investors should note that a positive distribution yield does not imply a positive return. Distribution share classes with a fixed dividend policy do not distribute a fixed amount and the constant percentage of distribution results in higher absolute distributions when the net asset value of the relevant Distribution share classes with fixed dividend policy is high, and lower absolute distributions when the net asset value of the relevant distribution share classes with fixed dividend policy is low.
- **You should note that in the circumstances where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the net asset value per share.**
- The distribution amount and net asset value of the currency hedged share class may be adversely affected by differences in the interest rates of the reference currency of the currency hedged share classes and the fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-currency hedged share classes.

12. Risks relating to hedging and the hedged classes

- In respect of the share classes which the management company of the fund has the ability to fully hedge the shares of such share classes in relation to the fund currency, currency exposures or currency hedging transactions within the fund's portfolio will not be considered. The aim of a currency hedged share class is to provide you with the performance returns of the fund's investments by reducing the effects of exchange rate fluctuations between the fund currency and the reference currency. However there is no assurance that the hedging strategies employed will be effective in fully eliminating the currency exposure to the reference currency thereby delivering performance differentials that are reflective only of interest rate differences adjusted for fees.
- Where undertaken, the effects of this hedging will be reflected in the net asset value and, therefore, in the performance of such share class. Similarly, any expenses arising from such hedging transactions will be borne by the share class in relation to which the expenses have been incurred.
- It should be noted that, where relevant, these hedging transactions may be entered into whether the reference currency is declining or increasing in value relative to the relevant fund currency and so, where such hedging is undertaken it may substantially protect investors in the relevant share class against a decrease in the value of the fund currency relative to the reference currency, but it may also preclude investors from benefiting from an increase in the value of the fund currency.

13. Currency risks

Assets and share classes may be denominated in currencies other than USD and some may not be freely convertible. The fund may be adversely affected by changes in foreign exchange rates and exchange rate controls of the currencies in which securities are held, the reference currencies of the share classes and the US Dollar. This exposes all share classes of the fund to exchange rate fluctuations and currency risk. It may not be practicable or possible to hedge against such foreign exchange/currency risk exposure.

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the fund's Class A USD Accumulation increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Comparator benchmark: 50% Markit iBoxx Asian Local Currency index + 50% JP Morgan Asian Credit index
- Fund launch date: 1998
- Class A USD Accumulation launch date: 2000
- The management company views the Class A USD Accumulation, being the retail share class denominated in the base currency of the fund, as the most appropriate representative share class of the fund.

Note: The performance of these years was achieved under circumstances that no longer apply. During these years, there were material changes to the fund, namely, changes of investment objective and policy and reduction of fee(s).

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?**Charges which may be payable by you**

You may have to pay the following fees when dealing in the shares of the fund.

| Fee | What you pay | | |
|------------------------------------|---|--|-----|
| Share class | A | A1 | D |
| Subscription fee (Initial charge) | Up to 3.00% of the total subscription amount | Up to 2.00% of the total subscription amount | Nil |
| Switching fee (Switching charge) | Up to 1.00% of the value of the shares to be switched | | Nil |
| Redemption fee (Redemption charge) | Nil | | |

Ongoing fees payable by the fund

The following expenses will be paid out of the fund. They affect you because they reduce the return you get on your investments.

| | Annual rate (as a % of the net asset value of the fund) | | |
|--|---|-------|-------|
| Share class * | A | A1 | D |
| Management fee (Annual Management Charge) | 1.00% | | |
| Depositary fee | Up to 0.005% | | |
| Performance fee | Nil | | |
| Administration fee | Up to 0.25% | | |
| Distribution charge (Annual Distribution Charge) | Nil | 0.50% | 1.00% |
| Custody safekeeping fee | Up to 0.3% | | |
| Transaction fees (charged by the Depositary) | Up to USD75 per transaction | | |
| Fund accounting and valuation fees | Up to 0.0083% | | |

* Where currency hedged share class is offered, a hedging charge of up to 0.03% per annum of the net asset value per share will be borne by the currency hedged share class in relation to which the charge is incurred. The hedging charge will be payable to the management company, which provides the currency hedging service.

Other fees

You may have to pay other fees when dealing in the shares of the fund. Please refer to the offering document for fees payable by the fund.

Additional information

- You generally buy and redeem shares at the fund's relevant net asset value ("NAV") after Schroder Investment Management (Hong Kong) Limited or the transfer agent's delegate, The Hongkong and Shanghai Banking Corporation Limited, receives your request, directly or via a distributor, in good order at or before 5pm HK time, being the fund's dealing cut-off time on each dealing day of the fund. Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- A dividend calendar including details on the distribution frequency and the dividend calculation basis for all available distribution share classes and a composition of the dividend payments (i.e. the percentages of distribution being paid out of capital and net distributable income) for the last twelve months for each of these distribution share classes (i) with a variable distribution policy or (ii) with a fixed dividend policy and paying dividends out of capital are also available from the Schroder Investment Management (Hong Kong) Limited on request and from the Schroders' Internet site (www.schroders.com.hk). This website has not been reviewed by the SFC.
- Past performance information of other share classes offered to Hong Kong investors is available online at www.schroders.com.hk. This website has not been reviewed by the SFC.
- The net asset value of this fund is calculated and the price of shares is published on each dealing day. They are available online at www.schroders.com.hk. This website has not been reviewed by the SFC.
