Schroder International Selection Fund US Large Cap

A Accumulation USD | Data as at 31.12.2022

Important Information

The fund invests primarily in equity and equity related securities of large-sized US companies.

- The fund invests in equity would subject to equity investment risk.
 - The fund invests in concentrated region and subjects to higher level of risks than a fund investing in a more diversified portfolio/strategy.
 - The fund may use derivatives to meet its investment objective. Derivatives exposure may involve higher counterparty, liquidity and valuation risks. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.
 - The fund had hedged share class and there is no assurance that the hedging strategies employed will be effective.
 - For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.
- You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

Investment Objectives

The Fund aims to provide capital growth in excess of the Standard & Poor's 500 (Net TR) Lagged index after fees have been deducted over a three to five year period by investing in equity and equity related securities of large-sized US companies.
