Risk Considerations

INVESTMENT INVOLVES RISKS. The value of the Fund can be volatile and investors may not get back the amount originally invested. Past performance is not indicative of future results.

- Templeton Global Smaller Companies Fund invests principally in common stocks of smaller companies throughout the world.
- The Fund is subject to market risk, equity risk, emerging markets risk, debt securities risk, foreign currency risk, Europe and Eurozone risk, liquidity risk, smaller- and mid-sized companies risk, credit risk, valuation risk, volatility risk, counterparty risk, Chinese market risk, convertible securities risk, securities lending risk, derivative instruments risk and warrants risk.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investors should not invest based on this marketing material alone. Offering documents should be read for further details, including the risk factors. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you.
