WHAT IS THIS PRODUCT?

PineBridge Europe Research Enhanced Equity Fund is a sub-fund of the PineBridge Global Funds (the “Fund”). The Fund is constituted in the form of a unit trust. It is domiciled in Ireland and its home regulator is the Central Bank of Ireland.

OBJECTIVES AND INVESTMENT STRATEGY

Objectives

The Sub-Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies whose assets, products or operations are located in Europe. Up to 10% of the value of the Sub-Fund may be invested in other companies which are listed on a European recognized exchange.

Strategy

The Sub-Fund may invest in developed Europe and, to a lesser extent, Emerging Markets in Europe including but not limited to Czech Republic, Hungary and Poland. “Emerging Markets” is defined as “is generally understood to refer to the markets of countries that are in the process of developing into modern industrialized states and thus display a high degree of potential but also entail a greater degree of risk. It shall include countries in Africa, Asia, Europe, Latin America and the Middle East”). The Sub-Fund may use financial derivative instruments (“FDIs”) including, but not limited to futures, options, swaps, forwards, and warrants for efficient portfolio management (including hedging) purposes only. The Sub-Fund will not use FDIs extensively for any purpose.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

Equity risk

- The value of equity and equity-related securities will be affected by economic, political, market, and issuer-specific changes, regardless of company specific performance. Different industries, financial markets, and securities can react differently to these changes. Moreover, such fluctuations of a Sub-Fund’s value are often worsened in the short-term.

Market volatility risk

- All markets are subject to volatility based on prevailing economic conditions. Some of the markets or exchanges on which the Sub-Fund may invest may prove to be highly volatile from time to time.

Country selection risk

- The Sub-Fund’s performance is often derived from its allocations to certain countries. These allocations may present greater opportunities and potential for capital appreciation, but may subject the Sub-Fund to concentration risk and higher risk of loss as compared to a portfolio which is diversified across different geographic regions.

Financial derivative instruments risk

- The leverage effect embedded in derivatives may result in substantial losses including and up to the total value of the assets of the Sub-Fund and the prices of derivatives can be highly volatile. The use of FDIs may expose the Sub-Fund to various types of risk, including but not limited to, counterparty, liquidity, correlation, credit, volatility, valuation and settlement risks which can have an adverse effect on the net asset value of the Sub-Fund.

Distributions from Capital risk

- Dividends, if any, may be paid out of the capital of the Sub-Fund. Where the Manager determines in its discretion to pay distributions in respect of the Sub-Fund, investors should note that such distributions amount to a return or withdrawal of part of an investor’s original investment or from any capital gains attributable to that original investment.
- Such distributions may result in an immediate decrease in the net asset value of the Sub-Fund.
- Where a class is hedged, the distribution amount and net asset value may be adversely affected by currency fluctuations between the reference currency of the hedged class and the base currency of the Sub-Fund, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged classes.

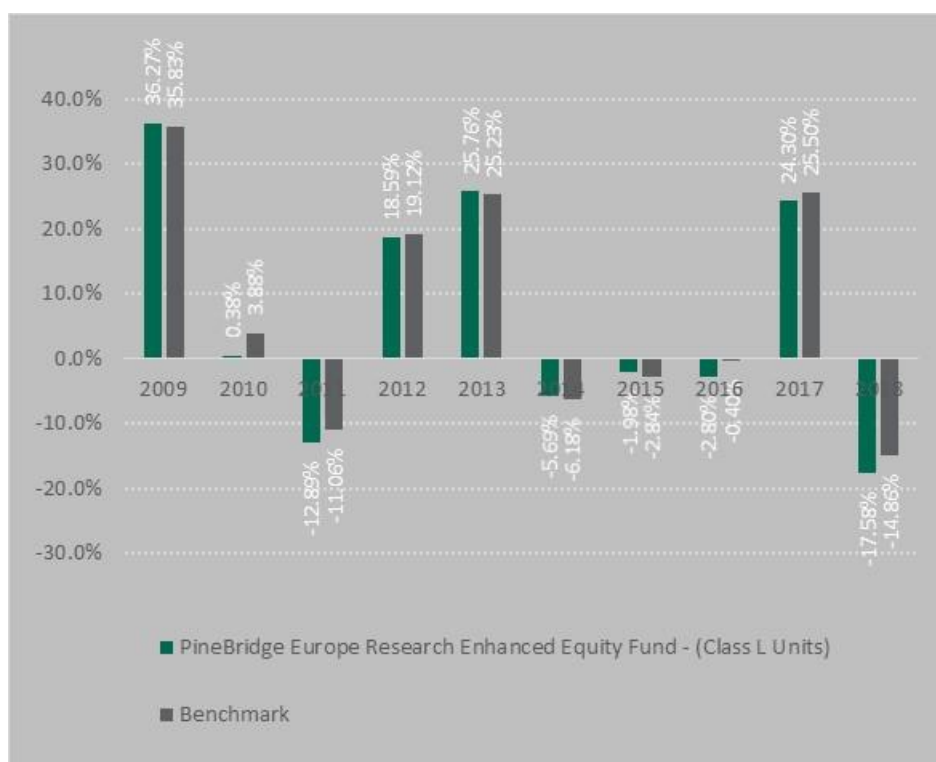

Investment loss risk

- The instruments invested by the Sub-Fund may fall in value and therefore your investment in the Sub-Fund may suffer losses.
- The value of the Sub-Fund may be adversely affected by developments in political, economical and social conditions and policies of the markets in which it invests which may result in losses to your investment.

Eurozone debt crisis risk

- In light of the fiscal conditions and concerns on sovereign debt of certain European countries (in particular, Portugal, Ireland, Italy, Greece and Spain), the Sub-Fund may be subject to a number of risks (such as higher volatility risk, liquidity risk, currency risk, default risk) arising from a potential crisis in the Eurozone.
- The crisis could potentially unfold in a number of ways, including but not limited to, **credit downgrade of a country**, one or several countries exiting the Eurozone, re-introduction of one or more individual currencies within the Eurozone, default of a sovereign within the Eurozone, potential dissolution of the Euro or partial or full break-up of the Eurozone. These potential developments, or market perceptions concerning these and related issues, could adversely affect the value of the Units of the Sub-Fund.

HOW HAS THE SUB-FUND PERFORMED?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the unit class increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD, including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Class L is an active unit class available for Hong Kong retail investors. It has been chosen to be the representative unit class for disclosure of past performance information in this statement.
- The benchmark of the Sub-Fund is MSCI Europe Daily Total Return Net Index.
- Sub-Fund / Class L launch date: 1 January 1993

IS THERE ANY GUARANTEE?

This Sub-Fund does not have any guarantee. You may not get back the full amount of money you invest.
