**What are the key risks?**

Investment involves risks. Please refer to the Explanatory Memorandum for details including the risk factors.

- Investment risk** — The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.
- Concentration risk** — The Sub-Fund invests primarily in the Asia region. The value of the Sub-Fund may be more volatile than Sub-Funds having a more diverse portfolio of investments. Additionally, the value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the single country or regional markets.
- Market risks (including emerging market risks)** — The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors, which may affect the NAV of the Sub-Fund. Further, the Sub-Fund may invest in emerging markets (such as Indonesia, India and China) which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- Currency risk** — Underlying investments of the Sub-Fund may be denominated in currencies other than the base currency of the Sub-Fund. Also, a class of units may be designated in a currency other than the base currency of the Sub-Fund. The NAV of the Sub-Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
- Risks associated with investment in China A-Shares through stock connect programmes** — The relevant rules and regulations on the stock connect securities trading and clearing linked programmes ("Stock Connect") are subject to change, which may have potential retrospective effect. The Stock Connect programmes are subject to quota limitations. Where a suspension in the trading through the programme is effected, the Sub-Fund's ability to invest in China A-shares or access the PRC market through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

### How has the Sub-Fund performed?

Past performance information is not indicative of future performance. Investors may not get back the full amount invested.

Performance data has been calculated in HKD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.

Where no past performance is shown there was insufficient data available in that year to provide performance.
