Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to: <https://www.invesco.com/managementcompany.lu>.

At Invesco we have looked to put in place minimum safeguards across multiple sub-funds of Invesco Funds (as listed above) to allow them to meet Article 8 requirements of the SFDR Regulation as of 2 November 2021. To be classified as a so-called Article 8 product, the sub-funds need to promote, among other things, environmental and/or social characteristics while also ensuring that investee companies follow good governance practices. In order to meet such requirements, it was determined that we would look to exclude certain activities based on certain thresholds, which may be updated from time to time. For further details please refer to the website of the management company at <https://www.invesco.com/managementcompany.lu>.

As noted above this is a proprietary framework developed by Invesco in line with Article 8 requirements of the Regulation (EU) 2019/2088 on sustainability. The framework is developed, maintained and monitored by Invesco. In order to assess companies against the noted criteria, Invesco uses a combination of Sustainalytics and ISS (Institutional Shareholder Services) to assess compliance, however, this can be supplemented with other service providers where appropriate. While there is a broad coverage across the various systems, there is no one system that has complete coverage of the entire investment universe. As a result, investment teams will be responsible for conducting an assessment of companies for which data is not available, under the appropriate supervision and oversight of our investment compliance and ESG teams.
