# What is this product?

Invesco Gold & Special Minerals Fund (the "Fund") is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

# **Objectives and Investment Strategy**

The Fund's investment objective is long-term growth of capital. The Fund invests primarily (at least 70% of the net asset value of the Fund) in the equity and equity related securities of companies engaged predominantly in exploring for, mining, processing, or dealing and investing in gold and other precious metals such as silver, platinum and palladium, as well as diamonds, worldwide.

The Fund can hold up to 10% of its net asset value in exchange traded funds and exchange traded commodities, which provide exposure to gold and other precious metals.

The Fund may enter into financial derivative instruments for efficient portfolio management, hedging and not extensively for investment purposes. The Fund's use of derivatives may include active financial derivative positions on equities which may be used to achieve both long and short positions, which overall will not result in the Fund being directionally short or short any asset class. In addition, the Fund will not have uncovered short positions, in line with appropriate UCITS regulatory requirements.

The Fund's use of financial derivative instruments may include but is not limited to options, futures and forwards.

The Fund will engage in securities lending, however, the proportion lent out at any time will be dependent on dynamics including, but not limited to, ensuring a reasonable rate of return for the lending Fund and borrowing demand in the market. As a result of such requirements, it is possible that no securities are lent out at certain times. The expected proportion of the net asset value of the Fund subject to securities lending is 20%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to securities to securities lending is 29%.

# Use of derivatives / investment in derivatives

The Fund's net derivative exposure<sup>1</sup> may be up to 50% of the Fund's net asset value.

# What are the key risks?

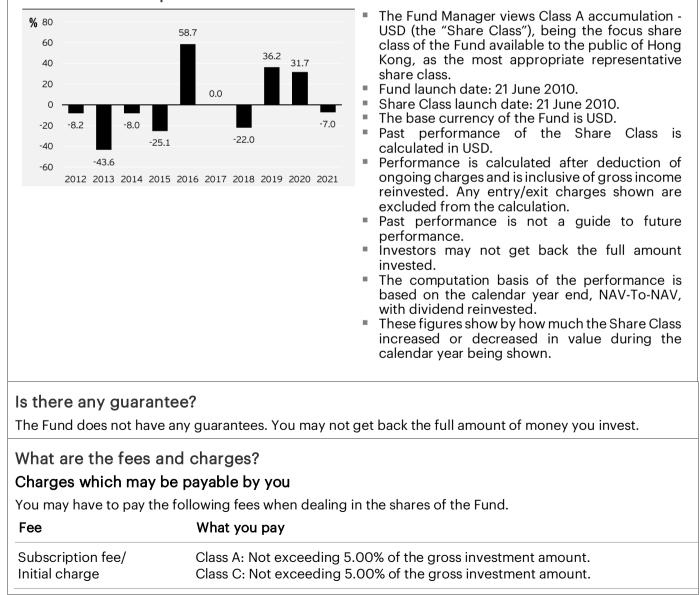

#### Investment involves risks. Please refer to the Prospectus for details including the risks factors.

- General investment risk There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- Currency exchange risk
  - The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
  - For the hedged share classes, there is no guarantee that the exposure of the currency in which the shares are denominated can be fully hedged at all times against the base currency of the Fund or the currency or currencies in which the assets of the Fund are denominated. Investors should also note that the successful implementation of the strategy may substantially reduce the benefit to shareholders in the relevant class of shares as a result of decreases in the value of the share class currency against the base currency of the Fund. In the event that investors request payment of redemption proceeds in a currency other than the currency in which the shares are denominated, the exposure of that currency to the currency in which the shares are denominated will not be hedged.
- Volatility risk Investors should note that volatility in the Fund's investment portfolio may result in large fluctuations in the net asset value of the Fund which may adversely affect the net asset value per share of the Fund and investors may as a result suffer losses.
- Equities risk The value of, and income derived from, equity securities held may fall as well as rise and the Fund may not recoup the original amount invested in such securities. The prices of and the income generated by equity securities may decline in response to certain events, including the activities and results of the issuer, general political, economic and market conditions, regional or global economic instability and currency and interest rate fluctuations. Thus, this may adversely impact the Fund and/or the interests of investors.
- Concentration risk As the Fund will invest primarily in equity and equity related securities engaged
  predominantly in exploring for, mining, processing, or dealing and investing in gold and other precious
  metals, such concentration may exhibit a higher than usual degree of risk and the Fund may be subject

<sup>&</sup>lt;sup>1</sup> Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

to above average volatility. The diversification benefits that would ordinarily accrue from investment in a fund having a more diverse portfolio of investments, may not apply to this Fund.

- Commodities risk Investors should note that investments which grant an exposure to commodities involve additional risks than those resulting from traditional investments. Political, military and natural events may influence the production and trading of commodities and terrorism and other criminal activities may have an influence on the availability of commodities and therefore influence and/or negatively impact financial instruments which grant exposure to commodities which may adversely impact the Fund and/or the interests of investors.
- Risk of investing in financial derivative instruments ("FDI") for efficient portfolio management and hedging purposes and for investment purposes Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund. As well as the risks identified above, the Fund may use derivatives for investment purposes and may be exposed to additional leveraged risk, which may result in significant fluctuations of the net asset value of the Fund and/or extreme losses where the Investment Manager is not successful in predicting market movements. This in turn may lead to an increase in the risk profile of the Fund.

# How has the Fund performed?

Switching fee	Up to 1.00% of the value of the shares being switched.
Redemption fee	N/A
Ongoing fees payable	e by the Fund
The following expenses on your investments.	will be paid out of the Fund. They affect you because they reduce the return you get

# Other fees

You may have to pay other fees when dealing in the shares of the Fund.

# Additional Information

- You generally buy and redeem shares at the Fund's next-determined net asset value after the Hong Kong Sub-Distributor and Representative receives your request in good order on or before 5:00pm, Hong Kong time, being the Fund's dealing cut-off time. Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal cut-off time (which may be earlier than the Fund's dealing cut-off time).
- The net asset value of the Fund is calculated each "Business Day" as defined in the Prospectus and the price of shares is published each Hong Kong business day (i.e. a day on which banks in Hong Kong are open for normal banking business) at www.invesco.com/hk. This website has not been reviewed by the SFC.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors at www.invesco.com/hk. This website has not been reviewed by the SFC.
- Investors may obtain other information of this product at www.invesco.com/hk. This website has not been reviewed by the SFC.
