Risk Considerations

INVESTMENT INVOLVES RISKS. The value of the Fund can be volatile and investors may not get back the amount originally invested. Past performance is not indicative of future results.

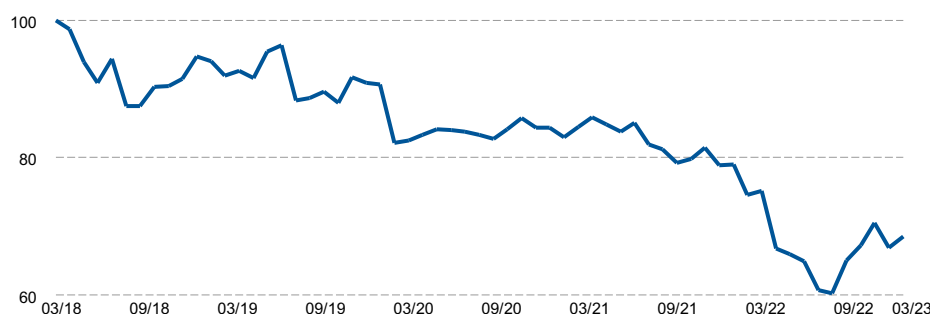

- Templeton Emerging Markets Bond Fund invests principally in debt securities of any quality in developing or emerging markets.
- The Fund is subject to debit securities risk, market risk, credit risk, emerging markets risk, non-regulated market risk, frontier markets risk, sustainability risk, foreign currency risk, liquidity risk, valuation risk, derivative instruments risk, credit-linked securities risk, swap agreements risk, securitisation risk, structured notes risk, warrants risk, counterparty risk, China Bond Connect risk, Chinese market risk, convertible securities risk, distressed securities risk, concentration risk, volatility risk, class hedging risk and securities lending risk.
- The Fund's investment in debt instruments with loss-absorption features ("LAP") are subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events which may result in a significant or total reduction in the value of such instruments. LAP may also be exposed to liquidity, valuation and sector concentration risk.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investors should not invest based on this marketing material alone. Offering documents should be read for further details, including the risk factors. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you.

Performance*

Past performance does not predict future returns.

The charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund.

Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

Portfolio Data Derivatives Disclosures

Market value figures reflect the trading value of the investments. Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Average Duration, Average Weighted Maturity and Yield to Maturity reflect certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

Important Information

Franklin Templeton Investments (Asia) Limited is the issuer of this document. This document is for information only and nothing contained herein constitutes investment advice. All charts, data, opinions, estimates and other information are provided as of the date of this document and may be subject to change without notice. This document is neither an offer nor solicitation to purchase shares of the fund. **Investment involves risks, fund value may go up as well as down and past performance is not an indicator or a guarantee of future performance.** The investment returns are calculated on NAV to NAV basis, taking into account of reinvestments and capital gain or loss. The investment returns are denominated in stated currency, which may be a foreign currency other than USD and HKD ("other foreign currency"). US/HK dollar-based investors are therefore exposed to fluctuations in the US/HK dollar / other foreign currency exchange rate. Please refer to the offering documents for further details, including the risk factors.

Any share class with "H1" in its name will attempt to hedge the currency risk between the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so. In some cases, investors may be subject to additional risks.

In addition, a summary of investor rights is available from <https://www.franklintempleton.com.hk/en-hk/about-us/summary-of-investor-rights>.

The fund(s)/ sub-fund(s) are notified for marketing in various regions under the UCITS Directive. The fund(s)/ sub-fund(s) can terminate such notifications for any share class and/or sub-fund at any time by using the process contained in Article 93a of the UCITS Directive.

For the avoidance of doubt, if you make a decision to invest, you will be buying units/shares in the fund(s)/sub-fund(s) and will not be investing directly in the underlying assets of the fund(s)/sub-fund(s).

*Explanatory Notes

Performance: Performance information is based on the stated share class only, in Fund Currency, NAV to NAV, taking into account of dividend reinvestments and capital gain or loss.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

The Fund's benchmark was changed from JP Morgan EMBI Index to JP Morgan EMBI Global Index on 1 January 1994 to better reflect the investment universe of the Fund.

Morningstar Category™: Copyright © Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is provided for reference purposes only. Past performance is not an indicator or a guarantee of future performance.

Distribution Yield: The Distribution Yield refers to annualized yield. The Distribution Yield is based on the most recent month's distribution and shown as an annualized percentage as of the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions. Information is historical and may not reflect current or future distributions. The formula for calculating Distribution Yield of the stated share class: $(nr/p) \times 100$. r = last dividend paid; p = month end NAV; n = distribution frequency. n = 12 for monthly distribution; n = 4 for quarterly distribution; n = 1 for yearly distribution.

Fund Management: In the case of portfolio managers who are CFA Charterholders, CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies (or internal ratings for unrated bonds, cash and equivalents), is provided to indicate the average credit rating of the portfolio's underlying investments and generally ranges from AAA (highest) to D (lowest). For unrated bonds, cash and equivalents, ratings may be assigned based on the ratings of the issuer, the ratings of the underlying holdings of a pooled investment vehicle, or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of investments by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower-rated bonds. The ACQ may be lower if cash and equivalents are excluded from the calculation. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.

Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio.

Asset Allocation/Composition of Fund: Due to rounding, the sum of portfolio may not equal 100%.

Fees: Maximum Annual Charge includes Management Fee and Maximum Maintenance Charge.
