A Accumulation USD | Data as at 31.12.2022

## Important Information

The fund invests primarily in equity and equity related securities, fixed income securities and alternative asset classes.

- The fund invests in equity would subject to equity investment risk.
- The fund invests in debt securities which may be subject to interest rate, credit and counterparty risks and risk relating to below investment grade and unrated debt securities, etc. .
- Investment in sovereign debt obligations which may expose the fund to political, social and economic risks. The fund may suffer significant losses upon defaults by government entities.
- The fund may invest in emerging markets and subject to ownership and custody risks, political and economic risks, market and settlement risks, etc. .
- The fund may invest in mortgage related and other asset backed securities that may be subject to interest rate, credit, valuation and liquidity risks.
- For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.
- The fund may use derivatives to meet its investment. Derivatives exposure may involve higher counterparty, liquidity and valuation risks. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.

You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

## Investment Objectives

The Fund aims to deliver an income of 3-5% per annum and capital growth over a three to five year period after fees have been deducted, by investing in a diversified range of assets and markets worldwide.

## Benchmark and corporate action information

The fund's performance should be assessed against the income target of 3-5% per year. The fund's volatility should be compared against 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD). The comparator benchmark is only included for volatility comparison purposes and does not have any bearing on how the investment manager invests the fund's assets. The fund's investment universe is expected to have limited overlap with the components of the comparator benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmark. The investment manager will invest in companies or sectors not included in the comparator benchmark. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for volatility purposes given the fund's investment objective and policy. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Effective 29.10.2021, the investment objective has been changed from "The Fund aims to provide an income distribution of 5% per annum and capital growth over a three to five year period after fees have been deducted by investing in a diversified range of assets and markets worldwide. The Fund aims to provide a volatility (a measure of how much the Fund's returns may vary over a year) of between 5-7% per annum." to "The Fund aims to deliver an income of 3-5% per annum and capital growth over a three to five year period after fees have been deducted by investing in a diversified range of assets and markets worldwide.". Effective 29.10.2021, the target benchmark has been changed from "being to provide income of 5% per year and capital growth and the volatility target of 5%-7% per year" to "the Fund's performance should be assessed against the income target of 3-5% per year". And the new comparator benchmarks, the 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD) have been added.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR).
