25 October 2023

Dear Shareholder,

Schroder International Selection Fund (the "Company") – changes to the distribution policy of certain share classes (the "Share Classes") of Global Multi-Asset Income

We are writing to inform you that following a recent review, we have decided to change the distribution policy for some of the Share Classes of Global Multi-Asset Income (the "**Fund**"), a sub-fund of the Company. The changes to the distribution policy for each of the affected Share Classes are listed in the appendix of this letter. The distribution frequency of the Share Classes will not change.

These changes will come into effect for the monthly distributions due to be paid on **11 December 2023** based on the number of shares held by the shareholders in the relevant Share Classes on the record date **29 November 2023** and will apply to all distributions going forward.

Background and rationale

We periodically review the distribution Share Classes and reserve the right to make changes. For example, if the investment income after expenses is higher than the target distribution, we may declare a higher amount to be distributed. Equally, we may deem it is appropriate to declare a dividend lower than the target distribution.

The Share Classes fees will remain unchanged and the costs of making these changes including regulatory and shareholder communication costs will be borne by Schroder Investment Management (Europe) S.A. which is the Company's management company.

Please note that distributions may be paid out of capital and reduce the Fund's net asset value. Please refer to the Hong Kong offering documents of the Company for the relevant risks relating to distributions paid out of capital. The information on the dividend compositions of the Share Classes will continue to be available from Schroder Investment Management (Hong Kong) Limited,

i.e. the Hong Kong Representative of the Company, on request and on the Schroders' Internet site (www.schroders.com.hk¹).

Save as disclosed above, (i) all other key features of the Fund (including fees chargeable in respect of the Fund as stated in the Hong Kong offering documents) will remain the same; (ii) there will be no change to the risks applicable to the Fund; and (iii) there will also be no material change in the operation and/or manner in which the Fund is being managed as a result of the changes set out above. The changes are not expected to materially prejudice the rights or interests of existing investors.

The Hong Kong offering documents of the Company will be revised to reflect the relevant changes and will be available free of charge at www.schroders.com.hk² or upon request from the Hong Kong Representative of the Company, Schroder Investment Management (Hong Kong) Limited.

Redeeming or switching your shares to another Schroders fund

We hope that you will choose to remain invested in the Fund following these changes, but if you do wish to redeem your holding in the Fund or to switch into another of the Company's sub-funds authorized by the Securities and Futures Commission ("SFC")³ or share classes of the Fund before the changes become effective you may do so at any time up to and including the dealing cut-off at 5:00 p.m. Hong Kong time on **29 November 2023**.

Please ensure that your redemption or switch instruction reaches the Hong Kong Representative or the Company's transfer agent's delegate, The Hongkong and Shanghai Banking Corporation Limited (the "**Delegate**") before this deadline. We or the Delegate will execute your redemption or switch instructions in accordance with the provisions of the Company's Hong Kong offering documents, free of charge, although in some countries local paying agents, correspondent banks or similar agents might charge transaction fees. Local intermediaries might also have a local dealing cut-off which is earlier than that described above, so please check with them to ensure that your instructions reach the Hong Kong Representative or the Delegate before the dealing cut-off at 5:00 p.m. Hong Kong time on **29 November 2023**.

We advise shareholders to read the Fund's latest product key facts statement and the Company's offering documents, which are available at www.schroders.com.hk⁴.

If you have any questions or would like more information, please contact your usual professional advisor or the Hong Kong Representative at Level 33, Two Pacific Place, 88 Queensway, Hong Kong or calling the Schroders Investor Hotline on (+852) 2869 6968.

Yours faithfully,

The Board of Directors

* This refers to the premium or discount that may apply to the distribution. Distributions may include a premium when the interest rate of a currency hedged share class is higher than the Fund's base currency interest rate. Consequently, when the interest rate of a currency hedged share class is lower than the Fund's base currency interest rate, the dividend may be discounted. The level of premium or discount is determined by differences in interest rates and is not part of the Fund's investment objective or investment policy.

According to the provisions of the Company's prospectus, distribution Share Classes may be issued with different distribution frequencies or attributes which are designated as follows:

Distribution frequency: M = monthly, Q = quarterly, S = semi-annual, A = annual

26 July 2023

Dear Shareholder,

Schroder International Selection Fund (the "Company") - changes to the distribution policy of certain share classes (the "Share Classes")

We are writing to inform you that following a recent review, we have decided to change the distribution policy for some of the Share Classes of the following sub-funds (together, the "Funds"):

- **Asian Bond Total Return**
- **Asian Equity Yield**
- **Emerging Markets Multi-Asset**
- **Global Corporate Bond**
- **Global Equity Yield**
- **Global High Yield**
- **Global Multi-Asset Income**
- **Hong Kong Dollar Bond**
- **Sustainable Multi-Asset Income**
- **US Dollar Bond**

The changes to the distribution policy for each of the affected Share Classes (as well as the names of certain Share Classes of Hong Kong Dollar Bond and Asian Bond Total Return) are listed in the appendix of this letter. Please refer to the Hong Kong offering documents of the Company for the relevant risks relating to distribution share classes with fixed distribution policy.

The changes will come into effect for the monthly distributions due to be paid on **11 September 2023** and the quarterly distributions due to be paid on **11 October 2023** (the "Effective Date"). This will be based on the number of shares held by shareholders in the relevant Share Classes on the record date **30 August 2023** for the monthly distributions and **27 September 2023** for the quarterly distributions, and will apply to all distributions going forward.

Background and rationale

We periodically review the distribution Share Classes and reserve the right to make changes. Dividend policy:	<p>A and A1 Accumulation share classes – Dividend will not be distributed but will be reinvested into the fund.</p> <p>A and A1 Distribution share classes – The board of directors generally has discretion as to whether or not to make any distribution save for the Distribution share classes with fixed dividend policy which are subject to the disclosures below. This distribution frequency and attributes are indicated in the share class designation as follows:</p> <p>M = monthly, Q = quarterly, S = semi-annual, A = annual,</p> <p>Currency carry#: C</p> <p>Distributions may be paid out of capital and reduce the fund's net asset value.</p>			

In respect of Distribution share classes with fixed dividend policy, the distribution amount per share is calculated as follows: dividend rate ÷ distribution frequency over a year × net asset value per share on the record date. Details of the Distribution share classes with fixed dividend policy are set out below:

Fixed Distribution Share Class	Currency	Distribution Frequency over a year	Dividend Rate
Class A USD Dis MF	USD	Monthly (12)	5.00% per annum
Class A1 USD Dis MF	USD	Monthly (12)	5.00% per annum
Class A HKD Dis MF	HKD	Monthly (12)	5.00% per annum
Class A GBP Hedged Dis MF	GBP	Monthly (12)	4.50% per annum
Class A RMB Hedged Dis MF	RMB	Monthly (12)	5.00% per annum

Investors should note that a positive distribution yield does not imply a positive return. The board of directors will periodically review fixed distribution share classes and reserves the right to make changes.

Financial year end of this fund: 31 December

Minimum investment: A and A1 share classes: Initial – EUR1,000 or USD1,000 (or equivalent); Subsequent investment – EUR1,000 or USD1,000 (or equivalent)

* The ongoing charges figure is based on the expenses for the year ended 31 December 2022. This figure may vary from year to year.

This refers to the premium or discount that may apply to the distribution. Distributions may include a premium when the interest rate of a currency hedged share class is higher than the fund's base currency interest rate. Consequently when the interest rate of a currency hedged share class is lower than the fund's base currency interest rate, the dividend may be discounted. The level of premium or discount is determined by differences in interest rates and is not part of the fund's investment objective or investment policy.

This is a sub-fund of Schroder International Selection Fund, a mutual fund domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Objectives and investment strategy

Investment Objective

The fund aims to deliver an income of 3-5% per annum and capital growth over a three to five year period^{Note} after fees have been deducted by investing in a diversified range of assets and markets worldwide.

^{Note} For clarification purpose, the three to five year period is considered as a medium to long term period, and is the period over which an investor should assess the fund's performance.

Investment Policy

The fund is actively managed and invests directly or indirectly through derivatives in equity and equity related securities, fixed income securities and alternative asset classes.

The fund may invest:

- up to 50% of its assets in below investment grade (fixed and floating rate) securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) and unrated securities;
- in excess of 50% of its assets in emerging market debt (fixed and floating rate) securities;
- up to 20% of its assets in asset-backed securities and mortgage-backed securities.

The alternative asset classes which the fund may invest include real estate, infrastructure, private equity, commodities, precious metals and alternative investment funds.

The fund may invest up to 10% of its assets in open-ended investment funds.

It is the current intention of the investment manager that the fund will not invest more than 10% of its net asset value in securities issued by or guaranteed by any single country with a credit rating below investment grade.

The fund may invest directly in China A-Shares via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect (collectively "Stock Connect") (as further described in the section headed "Stock Connect" in the Hong Kong Covering Document). Indirect exposure to China A-Shares may also be sought for the fund through investment in financial instruments such as China market access products and other funds with China access through Qualified Foreign Investor status. The fund does not currently intend to invest (i) more than 5% of the net asset value of the fund in China A-Shares via Stock Connect and (ii) 10% or more of the net asset value of the fund directly and indirectly in China A-Shares and China B-Shares.

The fund is not subject to any limitation on the portion of its net asset value that may be invested in any country (including emerging market countries), region or sector. The fund is not subject to any limitation on the market capitalisation of the companies that it may invest in.

The fund may invest in money market investments and hold cash.

The fund may invest up to 20% of its net asset value in debt instruments issued by financial institutions with loss-absorption features (e.g. contingent convertible bonds, Additional Tier 1, Tier 1 and Tier 2 capital notes, senior non-preferred notes, senior and subordinated bonds issued by holding companies of a financial institution). These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger events.

The fund may invest up to 10% of its net asset value in insurance-linked securities ("ILS"), such as catastrophe bonds, issued outside Hong Kong and/or any ILS-related products, such as derivatives or structured products whose returns are linked to the performance of any ILS and collective investment schemes whose investment objective or principal investment strategy is investing in ILS. For the avoidance of doubt, the fund will not invest in ILS issued in Hong Kong and their repackaged products and derivatives.

The fund maintains a higher overall sustainability score than 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD) based on the investment manager's rating system. More details on the investment process used to achieve this can be found in the Fund Characteristics section of the Fund Details, as set out in Appendix III of the Prospectus.

Under exceptional circumstances (e.g. market crash or major crisis), the fund may be invested temporarily up to 100% of its net asset value in liquid assets such as bank deposits, certificates of deposit, commercial paper and treasury bills for cash flow management.

The fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. Where the fund uses total return swaps

and contracts for difference, the underlying consists of instruments in which the fund may invest according to its investment objective and investment policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to during periods of expanding global economic growth and rising inflation or elevated geopolitical risk, or when credit spreads are expected to widen such during periods of falling economic growth, rising interest rates or elevated geopolitical risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 20% of the net asset value. In certain circumstances this proportion may be higher. Derivatives may be used to gain exposure to a wide range of asset classes including, but not limited to, currencies, real estate, infrastructure and commodities. Such derivatives include, but are not limited to, over-the-counter and/or exchange traded options, futures, warrants, swaps, forward contracts and/or a combination of the above.

The fund will have no or limited Renminbi (RMB) denominated underlying investments.

Benchmark

The fund's performance should be assessed against the income target of 3-5% per year. The fund's volatility should be compared against 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD). The comparator benchmark is only included for volatility comparison purposes and does not determine how the investment manager invests the fund's assets. The comparator benchmark is also used for sustainability score comparison. The fund's investment universe is expected to have limited overlap with the components of the comparator benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

Use of derivatives / investment in derivatives

The fund's net derivative exposure may be up to 50% of the fund's net asset value.

What are the key risks?

Investment involves risk. Please refer to the offering document for details including the risk factors.

1. Equity investment risk

Investment in equity securities is subject to the risk that the market value of the stocks may go down as well as up due to numerous factors such as changes in investment sentiment, political environment, economic environment, issuer-specific factors, regional or global economic instability, currency and interest rate fluctuations. If the market value of the stocks go down the net asset value of the fund may be adversely affected.

2. Risk relating to investment in debt securities

- **Credit and counterparty risk**— Investment in debt securities is subject to the credit/default risk of the issuer which may also adversely affect the settlement of the securities.
- **Interest rate risks**— Investment in the fund is subject to interest rate risk. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise.
- **Below investment grade and unrated debt securities**— Investments in fixed income securities below investment grade or unrated are generally subject to higher degree of counterparty risk, credit risk, volatility risk, liquidity risk and risk of loss of principal and interest than higher rated securities.
- **Credit ratings risk**— Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

- **Credit downgrading risk**— The credit rating of debt securities or their issuers may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may not dispose of such securities immediately and the fund may therefore be subject to additional risk of loss.
- **Liquidity and volatility risk**— Securities not listed or rated or actively traded may have low liquidity and higher volatility. The prices of such securities may be subject to fluctuations. The bid and offer spread of their price may be high and the fund may therefore incur significant trading costs and may even suffer losses when selling such instruments.
- **Valuation risk**— Valuation of the fund's investment may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

3. Sovereign debt risk

Investment in sovereign debt obligations issued or guaranteed by governments or their agencies of certain developing countries and certain developed countries may expose the fund to political, social and economic risk. A government entity's willingness or ability to repay principal and interest due in a timely manner may be affected by various factors. In the event that a government entity defaults on its sovereign debt, holders of sovereign debt, including the fund, may be requested to participate in the rescheduling of such debt and to extend further loans to the relevant government entity. The fund may suffer significant losses in such events.

4. Emerging and less developed markets

- The fund may invest in emerging and less developed markets. Investing in emerging and less developed markets is subject to greater risks than investing in securities of developed countries such as ownership and custody risks, political and economic risks, market and settlement risks, liquidity and volatility risk, legal and regulatory risks, execution and counterparty risk, currency risk, and possible repatriation of investment income and capital, which may adversely affect the net asset value per share of the fund and investors may as a result suffer losses.
- In addition taxation of interest and capital gains received by non-residents varies among emerging and less developed markets and, in some cases may be comparatively high. There may also be less well-defined tax laws and procedures and such laws may permit retroactive taxation so that the fund could in the future become subject to local tax liabilities that had not been anticipated in conducting investment activities or valuing assets.

5. Mortgage related and other asset backed securities ("ABS")

ABS may be highly illiquid and prone to substantial price volatility. These instruments may be subject to greater credit, liquidity and interest rate risk compared to other debt securities. ABS are often exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met, which may adversely impact the returns of the securities.

6. Derivatives

The fund may use derivatives to meet its specific investment objective. There is no guarantee that the performance of derivatives will result in a positive effect for the fund. Derivative exposure may lead to a high risk of significant capital loss. Risks associated with derivatives include credit risk and counterparty risk, liquidity risk, valuation risk, volatility risk, over-the-counter transaction risks and hedging risk. The leverage element/component of derivatives can result in a loss significantly greater than the amount invested in the derivatives by the fund. There is no guarantee that the desired hedging instruments will be available or hedging techniques will achieve their desired result. In adverse situations, the use of hedging instruments may become ineffective in hedging and the fund may suffer significant losses.

7. Concentrated geographical locations

The fund investing in concentrated geographical locations may be subject to a higher level of risks comparing to a fund investing in a more diversified portfolio/strategy. The value of the fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the relevant geographical locations.

8. Smaller companies risk

Fund invests in smaller companies may fluctuate in value more than other funds and may be more vulnerable to adverse developments than those in larger companies. During periods where markets are falling, securities of smaller companies may become less liquid and experience short-term price volatility and wide spreads between dealing prices.

9. Risks relating to distributions

- For distribution share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital; capital growth will be reduced and in periods of low growth capital erosion may occur.
- Distribution share classes with a fixed dividend policy will distribute the dividends based on a fixed amount or fixed percentage of the net asset value per share. This may result in share classes with fixed distributions either paying out both income and capital in distribution payments, or not substantially distributing all the investment income which a share class has earned.
- Investments in distribution share classes with fixed dividend policy are not an alternative to a savings account or fixed-interest paying investment. The percentage of distributions paid by distribution share classes with fixed dividend policy is unrelated to expected or past income or returns of these share classes or the fund. The distribution can thus be higher or lower than the income and return that were effectively realised.
- Distribution share classes with fixed dividend policy will continue to distribute in periods that the fund has negative returns or is making losses, which further reduces the net asset value of the distribution Share Classes with fixed dividend policy. In extreme circumstances, investors may not be able to get back the original investment amount.
- Investors should note that a positive distribution yield does not imply a positive return. Distribution share classes with a fixed dividend policy do not distribute a fixed amount and the constant percentage of distribution results in higher absolute distributions when the net asset value of the relevant Distribution share classes with fixed dividend policy is high, and lower absolute distributions when the net asset value of the relevant distribution share classes with fixed dividend policy is low.
- **You should note that in the circumstances where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the net asset value per share.**
- The distribution amount and net asset value of the currency hedged share class may be adversely affected by differences in the interest rates of the reference currency of the currency hedged share classes and the fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-currency hedged share classes.

10. Risks relating to hedging and the hedged classes

- In respect of the share classes which the management company of the fund has the ability to fully hedge the shares of such share classes in relation to the fund currency, currency exposures or currency hedging transactions within the fund's portfolio will not be considered. The aim of a currency hedged share class is to provide you with the performance returns of the fund's investments by reducing the effects of exchange rate fluctuations between the fund currency and the reference currency. However

there is no assurance that the hedging strategies employed will be effective in fully eliminating the currency exposure to the reference currency thereby delivering performance differentials that are reflective only of interest rate differences adjusted for fees.

- Where undertaken, the effects of this hedging will be reflected in the net asset value and, therefore, in the performance of such share class. Similarly, any expenses arising from such hedging transactions will be borne by the share class in relation to which the expenses have been incurred.
- It should be noted that, where relevant, these hedging transactions may be entered into whether the reference currency is declining or increasing in value relative to the relevant fund currency and so, where such hedging is undertaken it may substantially protect investors in the relevant share class against a decrease in the value of the fund currency relative to the reference currency, but it may also preclude investors from benefiting from an increase in the value of the fund currency.

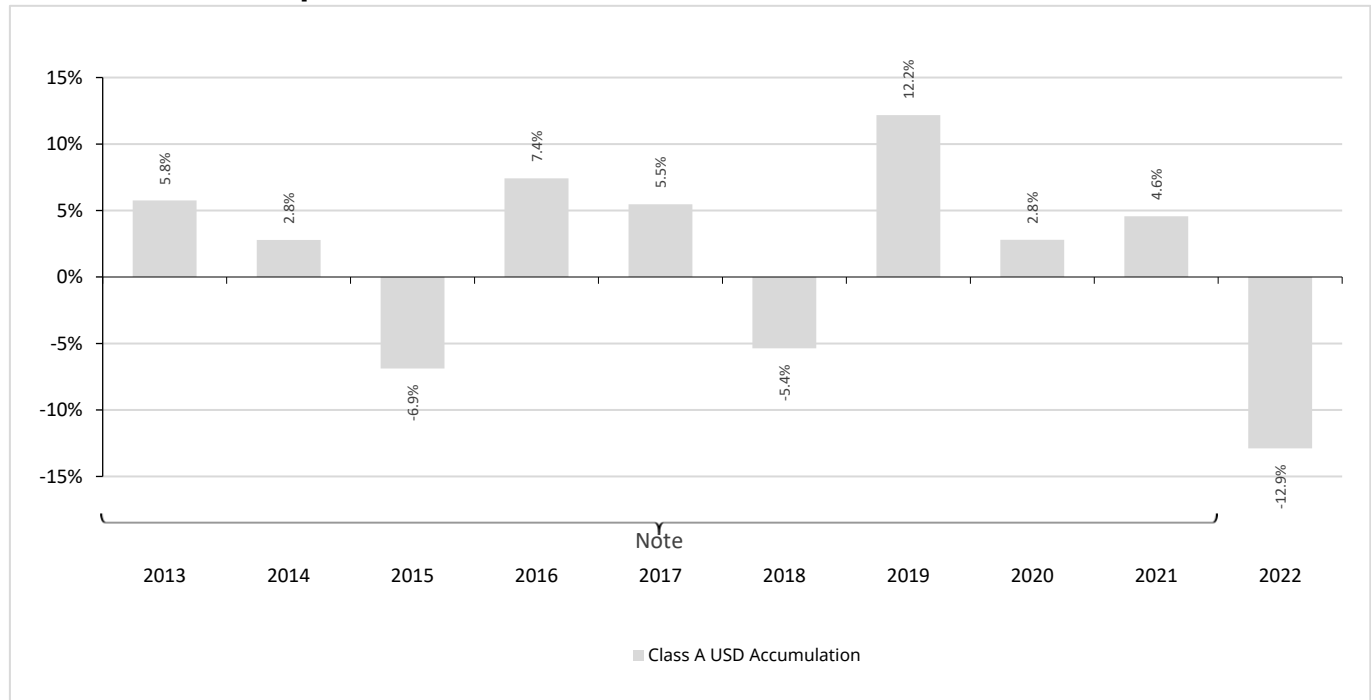

11. Currency risks

Assets and share classes may be denominated in currencies other than USD and some may not be freely convertible. The fund may be adversely affected by changes in foreign exchange rates and exchange rate controls of the currencies in which securities are held, the reference currencies of the share classes and the US Dollar. This exposes all share classes of the fund to exchange rate fluctuations and currency risk. It may not be practicable or possible to hedge against such foreign exchange/currency risk exposure.

12. RMB Currency Risk and RMB share classes related risk

- RMB is currently not freely convertible and is subject to foreign exchange control policies and restrictions.
- There can be no assurance that RMB will not be subject to depreciation. Any depreciation of RMB could adversely affect the value of investor's investment in share classes denominated in RMB.
- Share classes denominated in RMB will be valued with reference to offshore RMB ("CNH") rather than onshore RMB ("CNY"). While CNH and CNY represent the same currency, they are traded at different rates. Any divergence between CNH and CNY may adversely impact investors.
- Non-RMB based investors in share classes denominated in RMB may have to convert HK dollar or other currency(ies) into RMB when investing in share classes denominated in RMB and subsequently convert the RMB redemption proceeds and/or dividend payment (if any) back to HK dollar or such other currency(ies). Investors will incur currency conversion costs and you may suffer losses depending on the exchange rate movements of RMB relative to HK dollar or such other currencies.
- Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the fund's Class A USD Accumulation increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Fund launch date: 2012
- Class A USD Accumulation launch date: 2012
- The management company views the Class A USD Accumulation, being the retail share class denominated in the base currency of the fund, as the most appropriate representative share class of the fund.

Note: The performance of these years was achieved under circumstances that no longer apply. During these years, there were material changes to the fund, namely, changes of investment objective and policy, change of investment delegates and reduction of fee(s).

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invest.
