[#] The Fund may at its discretion pay dividends out of gross income while charging/paying all or part of its fees and expenses from the capital of the Fund, resulting in an increase in distributable income for the payment of dividends by the relevant class and therefore, the relevant class may effectively pay dividends out of capital, which will result in an immediate reduction of the NAV per share. The Board of Directors may amend the dividend policy subject to prior approval of the SFC (if required) and by giving not less than one month's prior written notice to Shareholders.

What is this Product?

The Fund is constituted in the form of a mutual fund, domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier ('CSSF').

Investment Objective and Investment Policy

Investment Objective

To achieve a high income with the prospect of capital growth from a portfolio of investments in global fixed interest securities.

Investment Policy

The Fund will invest primarily in higher yielding assets including high yield bonds, investment grade bonds, government bonds, convertible bonds and other bonds (such as corporate bonds issued by companies domiciled in emerging markets). The manager will only enter into derivative transactions for the purpose of efficient management of the portfolio including, but not limited to, forward currency transactions to hedge exposures back into Euros, interest rate futures to hedge duration exposure and credit default swaps and options to hedge credit risk, and not for investment.

The use of financial derivative instruments, including options, futures, portfolio swaps, forward currency contracts, is restricted to hedging and Efficient Portfolio Management purposes only. There may be significant periods of time where there is no use of financial derivative instruments for efficient portfolio management at all.

Financial derivative instruments will not be used with the objective of introducing gearing into the Fund's investment portfolio.

The Fund may invest less than 30% of its NAV in instruments with loss-absorption features, including contingent convertible bonds, senior non-preferred debts and debt instruments that meet the qualifying criteria to be Additional Tier 1 Capital or Tier 2 Capital under the Banking (Capital) Rules. The same principle applies to debt instruments issued under an equivalent regime of non-Hong Kong jurisdictions.

Benchmark Information

The Fund is actively managed. The Fund is not managed by reference to a benchmark and does not use a benchmark for performance comparison purposes. This means the Investment Manager is taking investment decisions with the intention of achieving the Fund's investment objective without reference to a benchmark. The Investment Manager is not in any way constrained by a benchmark in its portfolio positioning.

Use of derivatives/investment in derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's NAV.

What are the Key Risks?

Investment involves risks. The key risks associated with the Fund are set out below.

Please refer to the offering documents for details of all the risk factors.

1. General investment risk

The Fund is an investment fund. The Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.

2. Risks related to investments in fixed-income securities

The Fund is exposed to the credit/default risk of issuers of the fixed-income securities that the Fund may invest in.

Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

The credit rating of a fixed-income security or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the Fund may be adversely affected. The Investment Manager may or may not be able to dispose of the fixed-income securities that are being downgraded.

Price changes in fixed-income securities are influenced predominantly by interest rate developments in the capital markets, which in turn are influenced by macro-economic factors. Investment in the Fund is subject to interest rate risk. In general, the prices of fixed-income securities could suffer when capital market interest rates rise, while they could increase in value when capital market interest rates fall. The price changes also depend on the term or residual time to maturity of the fixed-income securities.

Valuation of the Fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the NAV of the Fund.

3. Risks related to investments in convertible securities

Convertible bonds are a hybrid between debt and equity, corporate bonds with an option that allows an investor to convert the bond into shares at a given price at specified times during the life of the convertible bond. This exposure to equity movements can lead to more volatility than could be expected from a comparable conventional corporate bond, or straight bond investments in general.

Investments in convertible bonds are subject to the same interest rate, credit, liquidity and prepayment risks associated with comparable conventional corporate bonds. Price changes in fixed-income securities are influenced significantly by interest rate developments in the capital markets, which in turn are influenced by macro-economic factors.

The values of convertible securities also may be affected by changes in the credit rating, liquidity or financial condition of the issuer. The Fund may also be exposed to the credit and insolvency risks of the issuers of the securities.

4. Risks associated with investments in debt instruments with loss-absorption features (including contingent convertible bonds)

- Debt instruments with loss-absorption features may be subject to greater risks when compared to traditional debt instruments as such instruments may be subject to

the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events (e.g. when the issuer is near or at the point of non-viability or when the issuer's capital ratio falls to a specified level), which are likely to be outside of the issuer's control. Such trigger events are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.

- In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.
- The Fund may invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss of principal invested.

5. Sovereign debt risks

Any investment by the Fund in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the Fund to participate in restructuring such debts. The Fund may suffer significant losses when there is a default of sovereign debt issuers.

6. Risks related to use of financial derivative instruments for hedging/efficient portfolio management

Risks associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. In adverse circumstances, the Fund's use of financial derivative instruments may become ineffective in hedging/efficient portfolio management and the Fund may suffer significant losses in relation to use of financial derivative investments. The leverage element/component can even result in a loss significantly greater than the amount invested in the financial derivative instrument by the Fund.

7. Risks related to foreign currencies

Given that the Fund may invest in assets which are not in its base currency and the class currency may be different from the base currency of the Fund, the investment returns may be affected unfavourably by the fluctuations in currency exchange rates between these currencies and the base currency and by changes in exchange rate controls. With the exception of those Share classes identified in the offering documents as being passive currency hedged (being the US Dollar, Sterling and Swiss Franc denominated classes), the Investment Manager does not currently intend to hedge the foreign currency exposure of the Fund.

8. Risks associated with distributions effectively out of capital

Payment of dividends effectively out of capital amounts to a return or withdrawal of part of a shareholder's original investment or from any capital gains attributable to that original investment. Any dividends involving payment of dividends effectively out of the capital of the relevant class may result in an immediate reduction of the NAV per share of the relevant class.

How has the Fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the share class increased or decreased in value during the calendar year being shown. Performance data has been calculated in EUR including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- Fund launch date: 8 May 2012
- Class L EUR Q Inc launch date: 8 May 2012
- The Investment Manager views Class L EUR Q Inc, being the retail share class denominated in the Fund's base currency and has the longest track record, as the most appropriate representative share class.

Is there any Guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the Fees and Charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund.

Fee	What you pay
Initial charge (Subscription fee)	Up to 3% of NAV
Conversion fee (Switching fee)	Up to 1% of NAV
Redemption charge	None

Ongoing fees payable by the Fund

The following expenses will be paid out of the Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the net asset value of the Fund, accrued daily)
Investment Management fee	Class L: Up to 1.25% Class D: Up to 0.5%
Depositary fee	Included in aggregate operating fee
Performance fee	None
Administration fee	Included in aggregate operating fee
Aggregate operating fee	Class L: Up to 0.2% Class D: Up to 0.18%

Other fees

You may have to pay other fees when dealing in the shares of the Fund. For further details please refer to page 79 of the Summary Prospectus.

Additional Information

- Shares are generally bought and redeemed at the Fund's next-determined net asset value provided that the Administrator, J.P. Morgan Bank Luxembourg S.A., receives a valid dealing request in good order on or before 1.00 pm (Luxembourg time) on every business day in Luxembourg, being the dealing deadline. The Hong Kong Representative, JPMorgan Chase Bank, N.A. Hong Kong Branch/ local distributors may impose different dealing deadlines for receiving instructions for subscriptions, conversions and redemptions. The Administrator in Luxembourg will accept dealing requests (for subscriptions, conversions and redemptions) submitted directly from Hong Kong investors if a day is a business day in Luxembourg but a public holiday in Hong Kong. Dealing requests (for subscriptions, conversions and redemptions) submitted directly from Hong Kong investors on a business day in Hong Kong but a public holiday in Luxembourg will be processed on the next business day in Luxembourg.
- Compositions of the dividends (if any) (i.e. the relative amounts/percentages paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Hong Kong Representative on request and also on the website www.jupiteram.com¹.
- The net asset value of the Fund is calculated and the price of shares is published each business day in Luxembourg. They are available online at www.jupiteram.com¹ and www.fundinfo.com¹ and at the registered office of the Company on every Valuation Day.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors from Jupiter Group's website (www.jupiteram.com¹).
- Price information is also available on request from the distributors and from the Administrator in Luxembourg.
