Directors' Report*

ALQUITY SICAV – ALQUITY AFRICA FUND

Africa offers a good investment opportunity for long-term investors who will be able to avoid the biggest risks and pitfalls. The region is expected to have the largest working-age population in the world by 2034 and will soon have the fastest urbanization rate in the world with 190mn people set to move from rural areas to cities in the next decade. However, the speed of development and the pace at which those evolutions occur will be very unequal from country to country.

The rebalancing of the Chinese economy, the US-China trade tensions, the lack of economic diversification, the volatility in oil and commodity prices, weak economic confidence induced by political instability and the weakness of institutions of some African countries, combined with the sluggish growth impacted negatively the performance of African equity markets in the eight years to June 30, 2019. The 12 months to June 30, 2019 was a negative for the African stock markets with the MSCI South Africa and MSCI EFM Africa ex South Africa delivering a total return of -0.8% and -10.4% in USD terms, respectively. The macroeconomic challenges investors face in Africa are of a different nature: capital controls, currency devaluation, parallel FX markets and persistently high inflation. Valuations more than reflect these challenges and fail to reflect the long-term potential of the continent. For example, Egypt devalued its currency by the 50% in November 2016 and have been implementing a structural reform agenda supported by an IMF package, which will help rebalance the economy and prepare it for sustainable economic growth.

The fund has low exposure to materials and real estate, while focusing on companies with a higher visibility on earnings growth outlook and strong execution capabilities. On a country basis the fund favours countries with both reliable and improving institutions and/or responsible governments who have laid down a clear agenda of structural reforms to underpin long-term sustainable growth. Countries like Egypt, Morocco, Botswana, Senegal, Mauritius or Tunisia fall in this category. Due to the economic and fiscal challenges South Africa faces, the visibility on the country's prospects have markedly deteriorated.

ALQUITY SICAV – ALQUITY INDIAN SUBCONTINENT FUND

India continues to be one of the strongest transformation stories across all of emerging markets. The BJP party, led by Prime Minister Narendra Modi, won the elections held in April 2019 with a large margin. The BJP-led coalition is the first government to hold a majority in India's lower house of parliament since 1984, which has enabled the Prime Minister to deliver economic reforms at a pace never seen before in India. As well as measures to encourage greater foreign investment, promote financial inclusion and subsidy reforms, the government's trophy piece of legislation has been the Goods and Services Tax (GST). The GST unites India as a single common tax market for the first time, removing a series of inter-state taxes and relieving companies of cascading tax burdens. The efficiency savings of the GST alone are thought to be worth up to an additional two percentage points of GDP per year.

The macroeconomic outlook for India remains favourable. The Central Bank of India embarked on a monetary easing cycle in January 2019 and reduced the policy interest rate by 110bp to 5.40% until August. Looser financial conditions will continue to boost domestic economic activity. The cyclical tailwinds will be further enhanced by the government's fiscal measures as well as by the favourable impact of the monsoon rains. We are positive on the outlook for the growth prospects for the Indian economy.

Bangladesh continues to enjoy a period of relative political stability and robust economic growth, with the domestic law and order situation remaining largely subdued. The economy continues to grow around 7% per year, with investments and household consumption among the most important drivers.

Pakistan's newly elected government has started the implementation of a pro-market reform agenda, which prioritises the restoration of the sustainability of economic growth and public finances. The initial steps included sharp interest rate hikes, the devaluation of the rupee and securing funds for the country's financing needs and entering an IMF programme.

ALQUITY SICAV – ALQUITY LATIN AMERICA FUND

Investor sentiment in Latin American stock markets improved in the 12-month period ending June 2019. As a result, the MSCI EM Latin America index rose 14.8% in USD in that period.

The Brazilian stock market delivered one of the strongest performances in the region, due to the fact that the pro-market and reformist Jair Bolsonaro's party won the election and took office in January 2019. After taking office, the Bolsonaro-led government prioritised pushing through the pension reform bill as fast as possible in order to stabilise the public finances and improve the growth potential of Brazil. Due to the reform process, investor sentiment in the Brazilian FX and stock market improved and translated into strong performance (+34.7% in USD in the 12-month period ending June 2019).

During this period the Mexican stock market underperformed (-6.5% in USD), due to the broad-based macroeconomic weaknesses, a marked slowdown in real GDP growth, strained public finances (including the state-owned Pemex) and disruptive economic policies by the AMLO government.

The Andean countries delivered a mixed performance in the period, as the Peruvian stock index gained 3.7% in USD, whilst the Chilean index declined 7.9% in USD. Meanwhile, Colombia's benchmark stock index decreased 8.1% in USD.

ALQUITY SICAV – ALQUITY ASIA FUND

The Chinese economy continued to perform strongly in the second half of 2018 and the first half of 2019 despite the trade wars between the United States and China. Despite the imposition of tariffs on Chinese goods flowing to the US, the growth of the domestic Chinese economy remained solid. Domestic economic activity has been also supported by easier financial conditions and targeted fiscal support measures. We are positive on the outlook for the growth prospects for the Indian economy.

Frontier markets have continued to provide some of the best growth opportunities in Asia. Vietnam's GDP growth rate remains between 6 and 7%, whilst foreign direct investment inflows were sustained at high levels. Bangladesh continues to enjoy a period of relative political stability and robust economic growth, with the domestic law and order situation remaining largely subdued. The economy continues to grow at around 7% per year, with investments and household consumption among the most important drivers.

ALQUITY SICAV – ALQUITY FUTURE WORLD FUND

The year ending June 2019 for the fund ended with the largest exposure to the Asian region, followed by the Latin American and African regions, respectively.

Frontier markets continue to offer some of the world's fastest GDP growth rates, translating in many cases to excellent growth prospects for local companies. Due to their reliance on domestically-driven growth factors, led by urbanisation and demographic trends, many frontier markets continue to enjoy a degree of isolation from the vagaries of global financial markets and volatility of international trade.

Over the twelve-month period to the end of June 2019, the MSCI Emerging Market index declined 1.4%, whilst the MSCI Frontier Market index edged rose 5.1%. The strongest markets expressed in USD were: Brazil, Thailand, the Philippines, Indonesia and India. Pakistan, Nigeria, South Korea and Egypt were among the largest under-performers.

REPORT OF THE *RÉVISEUR D'ENTREPRISES AGRÉÉ*

Opinion

We have audited the financial statements of ALQUITY SICAV (the "SICAV") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments as at June 30, 2019 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the SICAV and of each of its sub-funds as at June 30, 2019, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (Law of July 23, 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF). Our responsibilities under the Law of July 23, 2016 and ISAs are further described in the "Responsibilities of the *Réviseur d'Entreprises Agréé* for the Audit of the Financial Statements" section of our report. We are also independent of the SICAV in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the SICAV is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *Réviseur d'Entreprises Agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the SICAV for the financial statements

The Board of Directors of the SICAV is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the SICAV determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the SICAV is responsible for assessing the SICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the SICAV either intends to liquidate the SICAV or to cease operations, or has no realistic alternative but to do so.

REPORT OF THE *RÉVISEUR D'ENTREPRISES AGRÉÉ* (continued)

Responsibilities of the *Réviseur d'Entreprises agréé* for the audit of the financial statements

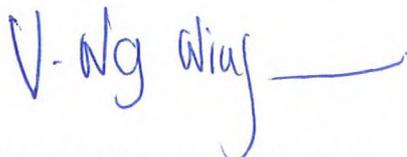

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *Réviseur d'Entreprises Agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the SICAV's internal control;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the SICAV;
- Conclude on the appropriateness of the Board of Directors of the SICAV's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the SICAV's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *Réviseur d'Entreprises Agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *Réviseur d'Entreprises Agréé*. However, future events or conditions may cause the SICAV to cease to continue as a going concern;
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The accounting policies of the SICAV comply with Luxembourg legal and regulatory requirements, applicable to collective investment undertakings in transferable securities.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

b) Valuation of assets

The assets of each sub-fund of the SICAV are valued in accordance with the following principles:

The value of any cash at hand or on deposit, bills, demand notes and accounts receivable, prepaid expenses, dividends and interests matured but not yet received are valued at the par-value of the assets, except if it appears that such value is unlikely to be received. In such a case, subject to the approval of the Board of Directors, the value shall be determined by deducting a certain amount to reflect the true value of the assets.

The value of Transferable Securities, Money Market Instruments and/or financial derivative instruments listed on an official Stock Exchange or dealt in on a regulated market which operates regularly and is recognised and open to the public (a “Regulated Market”), as defined by laws and regulations in force, is based on the latest available price and if such Transferable Securities are dealt in on several markets, on the basis of the latest known price on the stock exchange which is normally the principal market for such securities. If the latest known price is not representative, the value will be determined based on a reasonably foreseeable sales price to be determined prudently and in good faith by the Board of Directors.

In the event that any Transferable Securities or/and Money Market Instruments are not listed or dealt in on any stock exchange or any other Regulated Market operating regularly, recognised and open to the public, as defined by the laws and regulations in force, the value of such assets will be assessed on the basis of their foreseeable sales price estimated prudently and in good faith by the Board of Directors.

The liquidating value of derivative contracts not traded on exchanges or on other Regulated Markets means their net liquidating value determined by the Board of Directors in a fair and reasonable manner, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward and options contracts traded on exchanges or on other Regulated Markets is based upon the last available settlement prices of these contracts on exchanges and Regulated Markets on which the particular futures, forward or options contracts are traded by the SICAV; provided that if a futures, forward and options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract will be such value as the Board of Directors may deem fair and reasonable.

The value of Money Market Instruments not listed or dealt in on any stock exchange or any other Regulated Market and with remaining maturity of less than 12 months and of more than 90 days is deemed to be the nominal value thereof, increased by any interest accrued thereon. Money market instruments with a remaining maturity of 90 days or less are valued by the amortised cost method, which approximates market value.

Shares of UCITS and/or other UCI are valued at their last determined and available Net Asset Value or, if such price is not representative of the fair market value of such assets, then the price will be determined by the Board of Directors on a fair and equitable basis. Units of a closed-ended UCI will be valued at their last available stock market value.

All other securities and other assets are valued at fair market value, as determined in good faith pursuant to procedures established by the Board of Directors.

c) Conversion of foreign currencies of each sub-fund

The value of all assets and liabilities not expressed in the reference currency of a sub-fund is converted into the reference currency of such sub-fund at rates last quoted by major banks. Acquisition cost of investment securities, income and expenses not expressed in the reference currency of a sub-fund are converted into the reference currency of such sub-fund at the rate of exchange prevailing at the payment date. If such quotations are not available, the rate of exchange will be determined in good faith by or under procedures established by the Board of Directors.

d) Formation Expenses

Costs related to the establishment of any new sub-fund are borne by such new sub-fund.

The setup costs of any new sub-fund are amortised over a period of 5 (five) years starting on the date of the sub-fund's establishment. The amortisation method used is a progressive depreciation method where the amount amortised is increasing each year until the full amortisation on the fifth year as per the following percentages:

- 6.67% for the first year,
- 13.33% for the second year,
- 20.00% for the third year,
- 26.67% for the fourth year and
- 33.33% for the fifth year

The net amounts of formation expenses remaining and the associated amortisation amounts are shown in the Statement of Net Assets and the Statement of Operations and Changes in Net Assets.

The amortised amounts of these formation expenses are included within the Flat TER % (see note 8) which is charged on the sub-fund and disclosed on the KIID for each share class of the sub-fund. Formation expenses are fully amortized as at June 30, 2019.

e) Commission on share transactions

The commission on share transactions relates to introductory fees which are paid to distributors in relation to the Class B shares of all sub-funds. These amounts will become an asset of the relevant class and amortised over five years (deferred sales charges), at a rate similar to the scale of reduction in redemption charges noted below. This treatment will have the effect of reducing the return of the Class B shares of all sub-funds for the period of this amortisation. The amortisation is shared by the entire B share class of all the sub-funds whenever there is a subscription.

SECURITIES FINANCING TRANSACTIONS

The SICAV does not engage in securities financing transactions (as defined in Article 3 of Regulation (EU) 2015/2365 (the “Regulation”), securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). Accordingly, disclosures required by Article 13 of the Regulation are not applicable for the year ended June 30, 2019.

REMUNERATION POLICIES AND PRACTICES

The Management Company has established and applies a Remuneration Policy and practices that are consistent with, and promote, sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profiles, rules, the Prospectus or the Articles of incorporation nor impair compliance with the Management Company’s obligation to act in the best interest of the SICAV (the Remuneration Policy).

The Remuneration Policy includes fixed and variable components of salaries and applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers whose professional activities have a material impact on the risk profiles of the Management Company, the SICAV or the sub-funds. Within the Management Company, these categories of staff represent 22 persons.

The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Management Company, the SICAV and the Shareholders and includes measures to avoid conflicts of interest.

In particular, the Remuneration Policy ensures that:

- a) the staff engaged in control functions are compensated in accordance with the achievement of the objectives linked to their functions, independently of the performance of the business areas that they control;
- b) the fixed and variable components of total remuneration are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component;
- c) the measurement of performance used to calculate variable remuneration components or pools of variable remuneration components includes a comprehensive adjustment mechanism to integrate all relevant types of current and future risks.

The following table shows the fixed and variable remuneration in 2018 for the Identified Staff (22 persons), who is fully or partly involved in the activities of all the funds managed by the Management Company. For the purposes of the below disclosures, where portfolio management activities have been formally delegated to another entity, the remuneration of the relevant identified staff of the delegate has been excluded, as it is not paid out by the Management Company or by the SICAV.
