

FRAMLINGTON EQUITIES

AXA WF Framlington Europe Real Estate Securities A (H) q USD

Important note to Hong Kong investors

- This is a sub-fund of AXA World Funds which is a Luxembourg based open-ended investment company with several separate sub-funds (individually the "Sub-Fund" and collectively the "Sub-Funds") each with different investment objectives and risks profile.
- The Sub-Fund is mainly invested in equity for which there is a high risk of invested capital loss and is exposed to concentration risk on real estate and investment in specific geographic zones.
- The Sub-Fund is subject to currency and foreign exchange, Eurozone political, regulatory, economic and convertibility risks.
- This Sub-Fund may use derivative instruments and may subject the investor to additional risks including counterparty, volatility, valuation, leverage and liquidity risks.
- For the Distribution Shares, investors should be aware that dividends may be paid directly or effectively out of the Sub-Funds' capital at the Management Company's discretion. This may result in an immediate decrease in the net asset value per share of the Distribution Shares. Payment of distribution out of the Sub-Funds' capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment, which may further decrease the net asset value per share and may also reduce the capital available for the Sub-Funds for future investment and capital growth.
- Investors should not make investment decision on the basis of this document alone. The offering documents of the Fund should be read for further details including risk factors.

Fund Objective

The Sub-Fund seeks to achieve long term capital growth measured in Euros by investing mainly in listed equity issued by companies engaged in the real estate sector, domiciled or exercising the main part of their activities in Europe.

**Annualized Yield = $[(1 + \text{Dividend Per Share} / \text{Ex-Dividend Date NAV})^{\text{Number of dividend distribution per year} - 1} \times 100]$. The annualized yield is calculated based on the latest dividend distribution, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed. Past dividend yield is not indicative of future dividend.

Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained in the table above. You should read the relevant offering document (including the key facts statement) of the fund for further details including the risk factors.
