## abrdn SICAV I - Japanese Smaller Companies Sustainable Equity Fund

# abrdn

A Acc Hedged USD

#### 31 March 2024

- Important Information
- The Fund invests in equities and equity-related securities of smaller companies in Japan. Smaller Companies are defined as companies with a market capitalisation in the Base Currency of the Fund, as at the date of investment, of under Yen 500 billion.
- The Fund's exposure to a single country market increases potential volatility.
- Smaller companies are subject to the risk of greater vulnerability, and are generally of lower liquidity and greater volatility than larger companies. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value and subject to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk.
- Investment in this Fund may involve a high degree of risk and may not be suitable for all investors. It is possible that the entire value of the investment could be lost.
- Investors are responsible for their investment decisions and should ensure that the intermediary has advised on Fund's suitability and consistency with their investment objective. If in doubt, please seek independent financial and professional advice.
- Investors should not invest in this Fund based solely on this document and should read the relevant offering documents (particularly the
- investment policies and risk factors) for more details before investing.

#### Objective

The Fund aims to achieve a combination of growth and income by investing in smaller capitalisation companies in Japan, which adhere to the abrdn Japanese Smaller Companies Sustainable Equity Investment Approach (the "Investment Approach").

The Fund aims to outperform the MSCI Japan Small Cap Index (JPY) benchmark before charges. Performance

Tracking Error <sup>^</sup>	5.29	5.61

Source: abrdn, total return, Gross of Fees, BPSS, Datastream, USD, as of 29/02/2024.Please note the risk analytics figures are calculated on gross returns whereas the performance figures are based on net asset value (NAV) returns. In addition, the risk analytics figures lag the performance figures by one month. It should be noted that the figures provided regarding risk would be adjusted if fund fees and expenses were included.^ 3 and 5 year annualised. Beta is a measure of the volatility of a portfolio in comparison to a benchmark index. Fund volatility measures historical volatility. Information ratio measures the portfolio returns beyond the returns of a benchmark, usually an index, compared to the volatility of those returns. R-squared measures the percentage of a fund or securitys movements that can be explained by movements in a benchmark index. Tarking error measures the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the share classes within it, please refer to the Product Key Facts Statement and Prospectus which are available on our website www.abrdn.com/hk. The Prospectus also contains a glossary of key terms used in this document.

<sup>1</sup>These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

<sup>2</sup>The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.50% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds. There are other applicable costs. The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.

Hedged share classes aim to reduce the effect of exchange rate movements between the Fund base currency and the currency of the share class. Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

#### Important information

This document is strictly for informational purposes only and does not constitute an offer to sell, or solicitation of an offer to purchase any security, nor does it constitute investment advice, investment recommendation or an endorsement with respect to any investment products. Investors should not make an investment into the investment product based solely on this document and should read the relevant offering documents for more details to ensure that they fully understand the associated risks before investing. Investors are responsible for their investment decisions and should ensure that the intermediary has advised on the investment product's suitability. If in doubt, please seek independent financial and professional advice.

Investment involves risk. The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested. Past performance is not a guide to future performance. Investment returns are denominated in the base currency of the fund. US / HK dollar based investors are therefore exposed to fluctuations in the US dollar / HK dollar / base currency exchange rate. No liability whatsoever is accepted for any loss arising from any person acting on any information contained in this document.
