Class I GBP Inc: 0.75% <sup>#</sup>											
<b>Dealing frequency</b>	Daily										
<b>Base currency</b>	USD										
<b>Dividend policy*</b>	<p>For Distribution Unit Classes (Inc), dividends, if declared, will be paid.            For Accumulation Unit Classes (Acc), no dividend will be paid.</p> <p>* The Fund normally pays dividends out of surplus net income. However, the Manager may also distribute such part of any capital gains less realised and unrealised capital losses as, in its opinion, is appropriate to maintain a satisfactory level of distribution. Payment of distributions out of unrealised capital gains amounts to distribution out of capital under Hong Kong regulatory disclosure requirements and payment of distributions under such circumstances may result in an immediate reduction of the Fund’s net asset value per unit.</p>

## WHAT IS THIS PRODUCT?

Barings International Bond Fund is a sub-fund of Barings International Umbrella Fund, which is a unit trust domiciled in Ireland. Its home regulator is the Central Bank of Ireland.

## OBJECTIVES AND INVESTMENT STRATEGY

### Objectives

To achieve an attractive level of income together with long-term growth in the value of assets by investing in a diversified portfolio of fixed interest securities.

### Strategy

The Fund will invest at least 70% of its total assets at any one time in an internationally diversified portfolio of both corporate and government fixed interest securities. The portfolio may also, from time to time, include securities with floating interest rates. For this purpose, total assets exclude cash and ancillary liquidities.

Fixed interest securities will predominately be rated A- or better by Standard & Poor's ("S&P") or another internationally recognised credit rating agency or which are, in the opinion of the Manager, of similar credit status, and floating rate securities should be rated AA- or better by S&P or another internationally recognised credit rating agency or which are, in the opinion of the Manager, of similar credit status. Where a security is unrated by S&P, the rating will be that determined by the Investment Manager to be of comparable quality. No restriction on credit quality will apply to sovereign borrowers issuing in their own currency. However, the Fund is not expected to invest more than 10% of its net assets in securities issued and/or guaranteed by a single sovereign (including its government, a public or local government of that country) which is rated below investment grade by an internationally recognised rating agency. In the event of split rating, the highest credit rating accredited to the relevant sovereign issuer will be deemed the reference credit rating.

The Fund may also invest up to a maximum of 10% of the Fund's net asset value into collective investment schemes.

Although the net asset value of the Fund is expressed in US dollars, the relative attraction of investments denominated in other currencies is a major consideration of the Manager.

Under exceptional circumstances (e.g. economic conditions, political risks or world events, high downside risks during uncertainties, or closure of relevant market(s) due to unexpected events, such as political unrest, war or bankruptcy of large financial institutions), the Fund may temporarily invest up to 100% of its total assets in cash, deposits, treasury bills, government bonds or short-term money market instruments or have substantial holdings in cash and cash equivalents.

The Fund may use derivatives (including warrants, futures, options, currency forward contracts (including non-deliverable forwards), swap agreements and contracts for difference) for efficient portfolio management (including hedging) or investment purposes. Although derivatives may be used they will not be used, extensively for investment purposes.

The derivative techniques may include, but are not limited to: (i) hedging a currency exposure; (ii) using derivatives as a substitute for taking a position in the underlying asset where the Investment Manager feels that a derivative exposure to the underlying asset represents better value than a direct exposure; (iii) tailoring the Fund's interest rate exposure to the Investment Manager's outlook for interest rates; and/or (iv) gaining an exposure to the composition and performance of a particular index which are consistent with the investment objective and policies of the Fund .

## WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

### 1. Investment risk

- The Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. The Fund is an investment fund and is not in the nature of a bank deposit. There is no guarantee of repayment of principal.

### 2. Credit Risk

- The Fund is exposed to the credit/default risk of issuers of debt securities that the Fund may invest in.

### 3. Interest rate risk

- Investment in the Fund is subject to interest rate risk. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise.

### 4. Volatility and liquidity risk

- The debt instruments in which the Fund invests may not be traded on an active secondary market. Debt instruments in certain markets may be subject to higher volatility and lower liquidity when compared to more developed markets. The prices of securities traded in such markets may be subject to fluctuations. The bid and offer spreads of the price of such securities may be large and the Fund may incur significant trading costs.

### 5. Risk associated with investment in specific countries or regions

- The Fund's investment may be concentrated in specific countries or regions. In such event, the value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments.
- The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the specific country or region market.
- In light of ongoing concerns on the sovereign debt risk of certain countries within the Eurozone, the Fund's investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone, may have a negative impact on the value of the Fund.

### 6. Downgrading risk

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the Fund may be adversely affected. The Investment Manager may or may not be able to dispose of the debt instruments that are being downgraded.

### 7. Sovereign debt risk

- The Fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the Fund to participate in restructuring such debts. The Fund may suffer significant losses when there is a default of sovereign debt issuers.

### 8. Valuation risk

- Valuation of the Fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the Fund.

### 9. Credit rating risk

- Credit ratings assigned by rating agencies are also subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

### 10. Risks associated with sub-investment grade securities

- The Fund may invest in sub-investment grade securities or unrated. Such securities are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest than high-rated debt securities.

**11. Risks associated with derivatives and liquidity**

- The Fund may have exposure to derivatives for investment purposes or for efficient portfolio management. Risks associated with derivatives include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the derivative by the Fund. Exposure to derivatives may lead to a high risk of significant loss by the Fund.
- Furthermore, there is no guarantee that the Fund's use of derivatives for hedging will be entirely effective and in adverse situations, where the use of derivatives becomes ineffective, the Fund may suffer significant loss.
- There may not be active market for certain derivatives so that the purchase and sale of holding may take longer. The Fund may also encounter difficulties in disposing of derivatives at their fair market price.

**12. Counterparty risk**

- Counterparty risk is the risk that an organization does not pay out on a bond or other trade or transaction when it is supposed to. If a counterparty fails to honour its obligations in a timely manner and the Fund is delayed or prevented from exercising its rights with respect to the investments in its portfolio, it may experience a decline in the value of its position, lose income and/or incur costs associated with asserting its rights.

**13. Risks of investing convertible bonds**

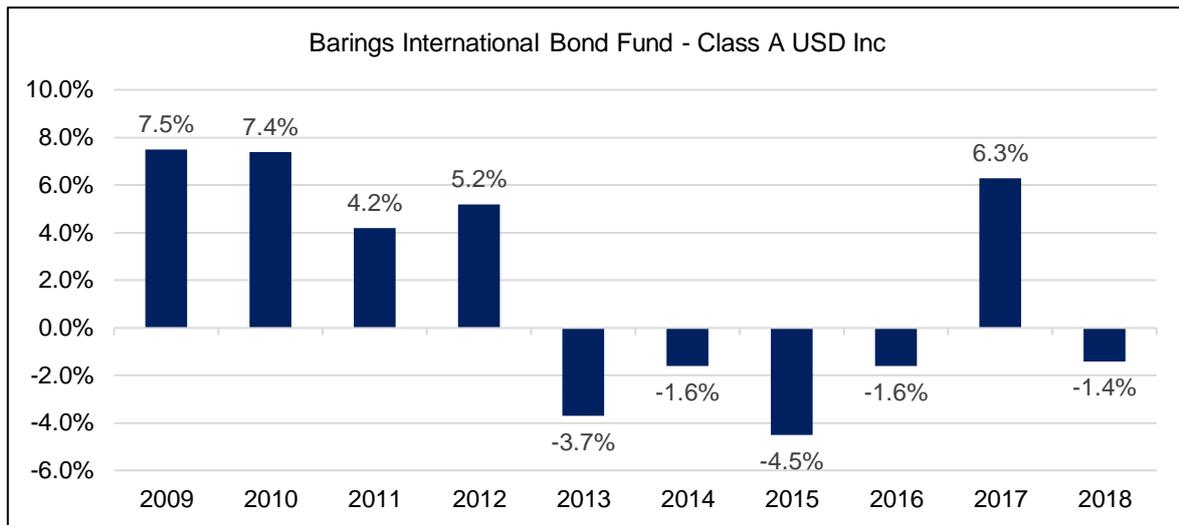

- Convertible bonds are a hybrid between debt and equity, permitting holders to convert into shares in the company issuing the bond at a specified future date. As such, convertibles will be exposed to equity movement and greater volatility than straight bond investments. Investments in convertible bonds are subject to the same interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable straight bond investments.

**14. Currency risk**

- The underlying investments of the Fund may be denominated in currencies other than the base currency of the Fund. Also, a class of units of the Fund may be designated in a currency other than the base Currency of the Fund. The net asset value of the Fund may be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

**15. Charges deducted from capital/risks relating to distribution**

- The Fund normally pays its management fee and other fees and expenses out of income (in accordance with Irish accounting guidelines). However, where insufficient income is available, the Manager may pay some or all of its management fee and other fees and expenses out of capital and out of both realised and unrealised capital gains less realised and unrealised capital losses. Where the management fee and other fees and expenses are deducted from capital rather than income generated, this may constrain growth and could erode capital.
- The Fund normally pays dividends out of surplus net income. However, the Manager may also distribute such part of any capital gains less realised and unrealised capital losses as, in its opinion, is appropriate to maintain a satisfactory level of distribution. Payment of distributions out of unrealised capital gains amounts to distribution out of capital under Hong Kong regulatory disclosure requirements and that payment of distributions under such circumstances amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of unrealised capital gains as dividends (which means effectively paying dividend out of capital) may result in an immediate reduction of the Fund's net asset value per unit.

**HOW HAS THE FUND PERFORMED?**

Source: Barings

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Class A USD Inc increased or decreased in value during the calendar year being shown. Performance data has been calculated in US dollars, including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Class A USD Inc is selected as representative unit class as it is a unit class offered to the public in Hong Kong and is denominated in the Fund's base currency.
- Fund launch date: 07 July 1978
- Class A USD Inc launch date: 07 July 1978

**IS THERE ANY GUARANTEE?**

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

**WHAT ARE THE FEES AND CHARGES?****Charges which may be payable by you**

You may have to pay the following fees when dealing in the units of the Fund.

<b>Fee</b>	<b>What you pay</b>
<b>Subscription fee (Preliminary charge)</b>	Class A Units: up to 5% of the net asset value per unit Class I Units: Nil
<b>Switching fee (Conversion charge)</b>	Nil
<b>Redemption fee (Redemption charge)</b>	Nil*

**Ongoing fees payable by the Fund**

The following expenses will be paid out of the Fund. They affect you because they reduce the return you get on your investments.

	<b>Annual rate (as a % of the Fund's net asset value ("NAV")), unless otherwise specified</b>
<b>Management fee</b>	Class A Units: 0.75% of the Fund's NAV attributable to the Class Class I Units: 0.50% of the Fund's NAV attributable to the Class
<b>Depository fee</b>	Included in the Administration, Depository and Operating Fee
<b>Performance fee</b>	Not applicable
<b>Administration, Depository and Operating Fee **</b>	Class A Units: 0.45% of the Fund's NAV attributable to the Class Class I Units: 0.25% of the Fund's NAV attributable to the Class
<b>Transaction fee</b>	At normal commercial rates
<b>Distributor fee</b>	Not applicable

\* At least 1 month's notice will be given to investors should any redemption fees be charged or increased up to the specified permitted maximum level as set out in the offering document.

\*\* The Administration, Depository and Operating Fee includes the aggregate fees and expenses of the Administrator and Depository and certain other fees and ongoing expenses. Please refer to the offering document for further details.

**Other fees**

You may have to pay other fees when dealing in the units of the Fund. The Fund will also bear the costs which are directly attributable to it, as set out in the offering document.

**ADDITIONAL INFORMATION**

- You generally subscribe and redeem units at the Fund's next-determined NAV per unit attributable to the relevant unit class after your request is received in good order by Baring Asset Management (Asia) Limited, our Hong Kong Representative, by 5 p.m. Hong Kong time on a Hong Kong Business Day<sup>1</sup> which is also a Dealing Day or the Manager by 12 noon Irish time on a Dealing Day. Dealing Days are every business day on which banks in both Ireland and the United Kingdom are open for business (excluding Saturday or Sunday). Before placing your subscription, redemption and/or conversion orders, please check with your distributor for the distributor's internal dealing deadline (which may be earlier than the Fund's dealing deadline).
- The NAV of the Fund is calculated and the prices of unit of the relevant unit classes are published for each Dealing Day, and are available online at [www.barings.com](http://www.barings.com)<sup>2</sup>.
- The composition of the dividends (i.e. the relative amounts paid out of net distributable income and capital) for the last 12 months can be obtained either through the Hong Kong Representative's website at [www.barings.com](http://www.barings.com)<sup>2</sup> or from the Hong Kong Representative on request.
- Investors may obtain the past performance information of other unit classes offered to Hong Kong investors from [www.barings.com](http://www.barings.com)<sup>2</sup>.
