<b>Dividend policy*</b>	For Distribution Unit Classes (Inc), dividends, if declared, will be paid. For Accumulation Unit Classes (Acc), no dividend will be paid.  * The Fund normally pays dividends out of surplus net income. However, the Manager may also distribute such part of any capital gains less realised and unrealised capital losses as, in its opinion, is appropriate to maintain a satisfactory level of distribution. Payment of distributions out of unrealised capital gains amounts to distribution out of capital under Hong Kong regulatory disclosure requirements and payment of distributions under such circumstances may result in an immediate reduction of the Fund’s net asset value per unit.

## WHAT IS THIS PRODUCT?

Barings Europa Fund is a sub-fund of Barings International Umbrella Fund, which is a unit trust domiciled in Ireland. Its home regulator is the Central Bank of Ireland.

## OBJECTIVES AND INVESTMENT STRATEGY

### Objectives

To achieve long-term capital growth in the value of assets by investing in companies in Europe (including the United Kingdom).

### Strategy

The Fund will invest at least 70% of its total assets at any one time in equities and equity-related securities (such as structured notes, participation notes or equity-linked notes) of companies incorporated in, or exercising the predominant part of their economic activity in, any European country (including the United Kingdom), or quoted or traded on the stock exchanges in those countries. Within Europe, the portfolio will be balanced according to the Manager's assessment of investment prospects for individual countries. There is no limit to the proportion of the Fund which may be invested in any one country. For this purpose, total assets exclude cash and ancillary liquidities.

The Fund may also invest in collective investment schemes in accordance with the requirements of the Central Bank of Ireland up to a maximum of 10% of the Fund's net asset value.

Under exceptional circumstances (e.g. economic conditions, political risks or world events, high downside risks during uncertainties, or closure of relevant market(s) due to unexpected events, such as political unrest, war or bankruptcy of large financial institutions), the Fund may temporarily invest up to 100% of its total assets in cash, deposits, treasury bills, government bonds or short-term money market instruments or have substantial holdings in cash and cash equivalents.

The Fund may use derivatives (including warrants, futures, options, currency forward contracts (including non-deliverable forwards), swap agreements and contracts for difference) for efficient portfolio management (including hedging) or investment purposes. Although derivatives may be used, they will not be used extensively for investment purposes.

The derivative techniques may include, but are not limited to: (i) hedging a currency exposure; (ii) using derivatives as a substitute for taking a position in the underlying asset where the Investment Manager feels that a derivative exposure to the underlying asset represents better value than a direct exposure; (iii) tailoring the Fund's interest rate exposure to the Investment Manager's outlook for interest rates; and/or (iv) gaining an exposure to the composition and performance of a particular index which are consistent with the investment objective and policies of the Fund.

Pursuant to the Investmentsteuergesetz (2018), the Fund intends to meet the requirements to be classified as being an "equity fund" and will invest at least 50% of its assets in direct equities.

## USE OF DERIVATIVES

The Fund's net derivative exposure may be up to 50% of the Fund's Net Asset Value.

## WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

### 1. Investment risk

- The Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. The Fund is an investment fund and is not in the nature of a bank deposit. There is no guarantee of repayment of principal.

### 2. Risks of investment in equities and equity-related securities

- The Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific

factors.

- The Fund may invest in equity-related securities such as structured notes, participation notes or equity-linked notes. These are usually issued by a broker, an investment bank or a company and are therefore subject to the risk of insolvency or default of the issuer. If there is no active market in these instruments, this may lead to liquidity risk. Further, investment in equity-linked securities may lead to dilution of performance of the Fund when compared to the other funds which invest directly in similar underlying assets due to fees embedded in the equity-related securities. The aforesaid circumstances may adversely affect the net asset value per unit of the Fund.
- Securities exchanges typically have the right to suspend or limit trading in any instrument traded on that exchange. Governments or the regulators may also implement policies that may affect the financial markets. A suspension could render it impossible for the Investment Manager or an underlying fund manager to liquidate positions and thereby expose the Fund to losses and may have a negative impact on the Fund.

### **3. Risks associated with investment in specific countries**

- The Fund's investments are concentrated in the European markets and therefore has a narrower focus than those funds which invest broadly across markets. The Fund typically offers less diversification and therefore is considered to be more risky. The value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments.
- The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the European markets.
- In light of ongoing concerns on the sovereign debt risk of certain countries within the Eurozone, the Fund's investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone, may have a negative impact on the value of the Fund.

### **4. Emerging market investment risk**

- The Fund may invest in securities of issuers operating in emerging markets of Europe. Investing in emerging market may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- High market volatility and potential settlement difficulties in such markets may also result in significant fluctuations in the prices of the securities traded on such markets and thereby may adversely affect the value of the Fund.

### **5. Risks associated with small-capitalisation / mid-capitalisation companies**

- The stock of small-capitalisation and mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general. Risks include economic risks, such as lack of product depth, limited geographical diversification, increased sensitivity to the business cycle and organisational risk, such as concentration of management and shareholders and key-person dependence. Shares in smaller companies can be more difficult to buy and sell, resulting in less flexibility, and sometimes higher costs, in implementing investment decisions.

### **6. Risks associated with derivatives and liquidity**

- The Fund may have exposure to derivatives for investment purposes or for efficient portfolio management. Risks associated with derivatives include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the derivative by the Fund. Exposure to derivatives may lead to a high risk of significant loss by the Fund.
- Furthermore, there is no guarantee that the Fund's use of derivatives for hedging will be entirely effective and in adverse situations, where the use of derivatives becomes ineffective, the Fund may suffer significant loss.
- There may not be active market for certain derivatives so that the purchase and sale of holding may take longer. The Fund may also encounter difficulties in disposing of derivatives at their fair market price.

### **7. Counterparty risk**

- Counterparty risk is the risk that an organization does not pay out on a bond or other trade or transaction when it is supposed to. If a counterparty fails to honour its obligations in a timely manner and the Fund is delayed or prevented from exercising its rights with respect to the investments in its portfolio, it may experience a decline in the value of its position, lose income and/or incur costs associated with asserting its rights.

### **8. Currency risk**

- The underlying investments of the Fund may be denominated in currencies other than the base currency of the Fund.

Also, a class of units of the Fund may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

#### 9. Charges deducted from capital/risks relating to distribution

- The Fund normally pays its management fee and other fees and expenses out of income (in accordance with Irish accounting guidelines). However, where insufficient income is available, the Manager may pay some or all of its management fee and other fees and expenses out of capital and out of both realised and unrealised capital gains less realised and unrealised capital losses. Where the management fee and other fees and expenses are deducted from capital rather than income generated, this may constrain growth and could erode capital.
- The Fund normally pays dividends out of surplus net income. However, the Manager may also distribute such part of any capital gains less realised and unrealised capital losses as, in its opinion, is appropriate to maintain a satisfactory level of distribution. Payment of distributions out of unrealised capital gains amounts to distribution out of capital under Hong Kong regulatory disclosure requirements and that payment of distributions under such circumstances amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of unrealised capital gains as dividends (which means effectively paying dividend out of capital) may result in an immediate reduction of the Fund's net asset value per unit.

#### HOW HAS THE FUND PERFORMED?

Source: Barings

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Class A USD Inc increased or decreased in value during the calendar year being shown. Performance data has been calculated in US dollars, including taking into account charges and excluding subscription fee and redemption fee you might have to pay.
- Class A USD Inc is selected as representative unit class as it is a unit class offered to the public in Hong Kong and is denominated in the Fund's base currency.
- Fund launch date: 21 April 1987
- Class A USD Inc launch date: 21 April 1987

#### ADDITIONAL INFORMATION

- You generally subscribe and redeem units at the Fund's next-determined NAV per unit attributable to the relevant unit class after your request is received in good order by Baring Asset Management (Asia) Limited, our Hong Kong Representative, by 5 p.m. Hong Kong time on a Hong Kong Business Day<sup>1</sup> which is also a Dealing Day or the Manager by 12 noon Irish time on a Dealing Day. Dealing Days are every business day on which banks in both Ireland and the United Kingdom are open for business (excluding Saturday or Sunday). Before placing your subscription, redemption and/or conversion orders, please check with your distributor for the distributor's internal dealing deadline (which may be earlier than the Fund's dealing deadline).

<sup>1</sup> "Hong Kong Business Day" means a day (other than a Saturday or Sunday) on which banks in Hong Kong are open for normal business, provided that where as a result of a number 8 typhoon signal, black rainstorm warning or other similar event, the period during which banks in Hong Kong are open on any day is reduced, such day shall not be a Hong Kong Business Day unless the Manager and the Depository determine otherwise or such other day or days as the Manager and the Depository may determine.

- The NAV of the Fund is calculated and the prices of unit of the relevant unit classes are published for each Dealing Day, and are available online at [www.barings.com](http://www.barings.com)<sup>2</sup>.
- The composition of the dividends (i.e. the relative amounts paid out of net distributable income and capital) for the last 12 months can be obtained either through the Hong Kong Representative's website at [www.barings.com](http://www.barings.com)<sup>2</sup> or from the Hong Kong Representative on request.
- You may obtain the past performance information of other unit classes offered to Hong Kong investors from [www.barings.com](http://www.barings.com)<sup>2</sup>.
