What is the product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier ("CSSF").

Investment Objectives

To achieve long-term total return by investing at least two-thirds of the Fund's assets in equities and equity-related securities of:

- 1) companies involved in high technology industries; and/or
- 2) companies which have the preponderance of their business activities in high technology industries; and/or
- 3) holding companies that have the preponderance of their assets in companies involved in high technology industries.

Strategy

The Fund may use derivatives for the purpose for hedging but will not use financial derivative instruments extensively for investment purposes.

What are the key risks?

Investment involves risks. Please refer to the offering document of Aberdeen Standard SICAV I for details including the risk factors.

1. Equity risk

- The value of the Fund that invests in equity and equity-related securities will be affected by economic, political, market, and issuer specific changes. Such changes may adversely affect securities, regardless of company specific performance.

2. Risk of investing in specialist market sector

- The Fund invests in a specialist market sector (i.e. high technology sector) and may exhibit greater price volatility than a more widely invested fund.
- The technology industries are at a very early stage of development, and many of the companies in these industries have a very short history. Rapid changes in technology could render obsolete the products and services offered by the companies in which the Fund invests, and cause severe or complete declines in the prices of the securities of those companies.

3. Risk of using financial derivative instruments

- Risks associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Fund. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Fund.

4. Exchange rates risk

- The Fund may invest in securities denominated in a number of different currencies other than the base currency in which the Fund is denominated. Changes in foreign currency exchange rates may adversely affect the value of the Fund's investments and the income thereon.

5. Risk of Foreign Account Tax Compliance Act ("FATCA")

- The Fund will attempt to satisfy any obligations imposed on it to avoid the imposition of FATCA withholding tax. However, no assurance can be given that the Fund will be able to satisfy these obligations. If the Fund becomes subject to a withholding tax as a result of the FATCA regime, the value of the shares held by the shareholders may suffer material losses.

6. General risk

- The value of shares and the income from them can go down as well as up and you may not get back the amount invested.

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year-end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A Acc USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay (if any).
- The Investment Manager views Class A Acc USD being the most appropriate representative share class as this share class is opened for investment by Hong Kong retail investors and broadly indicative of the Fund's performance characteristics.
- Fund launch date: 02/2000
- Class A Acc USD launch date: 02/2000

Is there any guarantee?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.
