What is the product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier (“CSSF”).

Investment Objectives

To achieve long-term total return by investing at least two-thirds of the Fund’s assets in equities and equity-related securities of:

- 1) Smaller Companies with their registered office in Japan; and/or
- 2) Smaller Companies which have the preponderance of their business activities in Japan; and/or
- 3) holding companies that have the preponderance of their assets in Smaller Companies with their registered office in Japan.

For the purpose of this Fund, Smaller Companies are defined as companies with a market capitalisation in the base currency of the Fund, as at the date of investment, of under Yen 500 billion.

Strategy

The Fund may use derivatives for the purpose for hedging but will not use financial derivative instruments for investment purposes.

Use of derivatives/investment in derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document of Aberdeen Standard SICAV I for details including the risk factors.

1. Equity risk

- The value of the Fund that invests in equity and equity-related securities will be affected by economic, political, market, and issuer specific changes. Such changes may adversely affect securities, regardless of company specific performance.

2. Concentration risk

- The Fund invests in a single country market (i.e. Japan) and is likely to be more volatile than a more widely invested fund.
- Lack of liquidity may adversely affect the value or ease of disposal of assets.

3. Risk of investing in Smaller Companies

- Smaller Companies are subject to the risk of greater vulnerability to the release of unfavourable market news and information and the risk of being adversely affected by poor economic or market conditions. The stock of Smaller Companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger companies in general.

4. Risk of using financial derivative instruments

- Risks associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Fund. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Fund.

5. Exchange rates risk

- The Fund may invest in securities denominated in a number of different currencies other than the base currency in which the Fund is denominated. Changes in foreign currency exchange rates may adversely affect the value of the Fund's investments and the income thereon.

6. Risk of Foreign Account Tax Compliance Act ("FATCA")

- The Fund will attempt to satisfy any obligations imposed on it to avoid the imposition of FATCA withholding tax. However, no assurance can be given that the Fund will be able to satisfy these obligations. If the Fund becomes subject to a withholding tax as a result of the FATCA regime, the value of the shares held by the shareholders may suffer material losses.

7. General risk

- The value of shares and the income from them can go down as well as up and you may not get back the amount invested.

How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year-end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A Acc JPY increased or decreased in value during the calendar year being shown. Performance data has been calculated in JPY including ongoing charges and excluding subscription fee and redemption fee you might have to pay (if any).
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- The Investment Manager views Class A Acc JPY being the most appropriate representative share class as this share class is opened for investment by Hong Kong retail investors and broadly indicative of the Fund's performance characteristics.
- Fund launch date: 05/1984
- Class A Acc JPY launch date: 04/2007

Is there any guarantee?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.
