This fund will invest in bonds or debt securities which may be subject to credit, liquidity, counterparty and market risks. The fund will invest in non-investment grade bonds and unrated securities which may be subject to greater credit and liquidity risks, and may be more volatile than higher rated securities. The fund may invest in onshore China fixed income securities directly through the Qualified Foreign Institutional Investor ("QFII") scheme and may incur losses due to limited investment opportunities, illiquidity of the onshore China fixed income securities, and/or delay or disruption in execution of trades or in settlement of trades. - This fund can invest in derivative instruments which may involve additional risks (For example, leverage may cause greater volatility).
- Dividend of certain share classes, at the Board's discretion, may be 1) paid out of gross income, i.e. the fund may pay dividend effectively out of capital; or 2) paid directly out of capital where the net income generated by the fund is insufficient to pay a distribution as declared.
