	Class A	USD 2,500	USD 1,000
	Class Y	USD 2,500	USD 1,000

What is this product?

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

- The fund is an Equity fund and aims to provide long-term capital growth with the level of income expected to be low.
- The fund invests principally (i.e. at least 70% (and normally 75%) of the fund's assets) in equity securities quoted on stock exchanges in the Greater China region, which includes Hong Kong, China and Taiwan. This region includes certain countries considered to be emerging markets.
- The fund will potentially invest up to 10% of its net asset value directly in China A and B shares, with aggregate exposure including direct and indirect investments being less than 30% of its net asset value. The fund will have direct exposures to the China A Shares markets through the QFII quota of FIL Investment Management (Hong Kong) Limited, the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect (collectively, "Stock Connect") or through any permissible means available to the fund under prevailing laws and regulations. The fund may also have indirect exposures through financial instruments that invest in or are linked to the performance of China A Shares, e.g. via equity-linked notes.
- The fund invests in the Greater China region, which includes Hong Kong, China, and Taiwan and may invest in different countries in this region. It is unconstrained in the amount that it may invest in any country in this region.

- For the remaining assets, the Investment Manager has the freedom to invest outside the fund's principal geographies, market sectors, currency or asset classes.
- In selecting securities for the fund, several factors are considered in the investment process; for example, consideration may include, but is not limited to, a company's financials, including revenue and profit growth, return on capital, cash flows and other financial measures. In addition, company management, industry and economic environment, and other factors may be considered in the investment process.
- The fund may invest in assets directly or achieve exposure indirectly through other eligible means including financial derivative instruments ("**derivatives**"). Such derivatives may include over-the-counter and/or exchange traded instruments such as futures, contracts for difference, equity swaps, options such as puts, calls and warrants, forwards, non-deliverable forwards and currency swaps. The fund may use derivatives with the aim of risk or cost reduction or to generate additional capital or income (including for investment purposes), in line with the risk profile of the fund. However, the fund will not make extensive use of derivatives for investment purposes or use complex derivatives or strategies to meet the investment objectives of the fund.
- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in securities lending, repurchase and reverse repurchase transactions.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong Prospectus for details including the risk factors.

Risk to Capital and Income (Investment Risk)

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

Equities

- The fund's investment in equities securities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events including changes in investment sentiment, political and economic conditions and issuer-specific factors.

Valuation Risk

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

QFII Risk

- The fund's ability to make the relevant investments or to fully implement or pursue its investment objective and strategy is subject to the applicable laws, rules and regulations (including restrictions on investments, minimum investment holding periods and repatriation of principal and profits) in the PRC, which are subject to change and such change may have potential retrospective effect.
- The fund may suffer substantial losses if there is insufficient QFII quota allocated for the fund to make investments, the approval of the QFII is being revoked/terminated or otherwise invalidated as the fund may be prohibited from trading of relevant securities and repatriation of the fund's monies, or if any of the key operators or parties (including QFII custodian/brokers) is bankrupt/in default and/or is disqualified from performing its obligations (including execution or settlement of any transaction or transfer of monies or securities).

Risks associated with the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (collectively, the "Stock Connect")

- The fund may invest and have direct access to certain eligible China A Shares via the Stock Connect. The relevant rules and regulations on Stock Connect are subject to change which may have potential retrospective effect.
- Investments through the Stock Connect are subject to risks, such as quota limitations, suspension risk, operational risk, restrictions on selling imposed by front-end monitoring, recalling of eligible stocks, clearing and settlement risks, nominee arrangements in holding China A Shares and regulatory risk. Where a suspension in the trading through the programme is effected, the fund's ability to invest in China A-shares or access the PRC market through the programme will be adversely affected. In such event, the fund's ability to achieve its investment objective could be negatively affected.

Chinese Renminbi Currency and Conversion Risk

- Chinese Renminbi (RMB) is currently traded in two markets: one in Mainland China (onshore RMB, or CNY) and one outside Mainland China (primarily in Hong Kong) (offshore RMB, or CNH). Although CNH and CNY are the same currency, they trade at different rates, and any divergence between CNH and CNY may adversely impact investors. CNY is not freely convertible and is subject to exchange controls and certain requirements by the government of Mainland China, whereas CNH is freely tradable. There is no guarantee that the value of RMB against the investors' base currencies will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the fund. Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

China Assets Risk

- Investments by a fund in China A/B Shares and other permissible securities denominated in RMB may be made through any permissible means pursuant to any prevailing regulations, including through the Qualified Foreign Institutional Investor (“QFII”) quota, the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect programmes (collectively, “Stock Connect”) and any other eligible means. The uncertainty and change of the relevant laws and regulations in the People’s Republic of China (“PRC”) and the potential for the PRC government and/or the regulators to implement political, social and economic policies that may affect the financial markets may have an adverse impact on such a fund. High market volatility and potential settlement difficulties in the PRC markets may also result in significant fluctuations in the prices of the securities traded on such markets.

Emerging Markets

- This fund invests in emerging market securities which may involve increased risks and special considerations not typically associated with the investment in securities in more developed markets. The price of these securities may be more volatile and/or less liquid than those of securities in more developed markets.
- This volatility or lack of liquidity may stem from political, economic, legal, taxation, settlement, transfer of securities, custody and currency/currency control factors.
- Although care is taken to understand and manage these risks, the fund and accordingly the shareholders in the fund will ultimately bear the risks associated with investing in these markets.

Foreign Currency Risk

- The fund’s assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund’s net asset value.

Stock/Issuer Concentration

- At times, the fund will invest in a relatively small number of investments or issuers and may experience a more volatile net asset value as a result of this concentration of holdings relative to a fund that diversifies across a larger number of investments or issuers.

Financial Derivative Instruments

- Although the fund will not make extensive use of derivatives for investment purposes or use complex derivatives or strategies to meet the investment objectives of the fund, the use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instruments by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

How has the fund performed?

The performance during the years prior to 2012 was achieved under circumstances that may no longer apply as the investment objective was changed in 2012.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- Fund launch date: 1990
- Class A-USD launch date: 1990
- Class A-USD is selected as the most appropriate representative share class as it has the longest track record and is denominated in the fund’s reference currency.

Is there any guarantee?

This fund does not have any guarantees. You may not get back the full amount of money you invested.

What are the fees and charges?

Charges which may be payable by you

You have to pay the following fees when dealing in shares of the fund:

Subscription Fee	Class A - Up to 5.25% of NAV Class Y - 0%
Switching Fee	Generally up to 1% of NAV, except if you are switching from one class with no subscription fee into a class with subscription fee, you will have to pay for a switching fee of up to the full subscription fee of the class to be switched
Redemption Fee	N/A

Ongoing fees payable by the fund

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

Management Fee*	Class A - Up to 1.50% p.a. of NAV Class Y - Up to 0.80% p.a. of NAV
Depository Fee	Varies from 0.003% to 0.35% of NAV
Performance Fee	N/A
Administration Fee	Up to 0.35% of NAV

* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months' notice will be given to you.

Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong Prospectus. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong Prospectus.

Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund will be published in the South China Morning Post and the Hong Kong Economic Times.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from www.fidelity.com.hk*
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
