	Class A	USD 2,500	USD 1,000
	Class Y	USD 2,500	USD 1,000

### What is this product?

Fidelity Funds is an open-ended investment company established in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

### Objectives and investment policy

- The fund is a Multi Asset fund and will be managed with a more conservative approach towards seeking high current income and capital growth primarily (i.e. at least 70% of the fund's assets) through investment in a combination of equities and bonds issued in the developed and emerging markets.
- As the fund may invest globally, it may invest across different countries and regions. It is unconstrained in the amount it may invest in any single country or region.
- The fund's source of income will mainly be generated from dividend payments from equity securities and coupon payments from bond holdings.
- The fund may invest in assets directly or achieve exposure indirectly through other eligible means including financial derivative instruments ("derivatives"). Such derivatives may include over-the-counter and/or exchange traded instruments such as derivatives referencing underlying equity assets (such as futures, contracts for difference, equity swaps, options such as put, calls and warrants) and derivatives referencing underlying fixed income assets or components thereof (such as interest rate or bond futures, options and interest rate, total return or inflation swaps, bond futures, credit default and total return swaps, forwards including non-deliverable forwards and currency swaps). The fund may use derivatives with the aim of risk or cost reduction or to generate additional capital or income (including for investment purposes), in line with the risk profile of the fund. However, the fund will not make extensive use of derivatives for investment purposes or use complex derivatives or strategies to meet the investment objectives of the fund.

- The fund will not invest more than 10% of their net asset value in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.
- The fund will not engage extensively in securities lending, repurchase and reverse repurchase transactions.

### **What are the key risks?**

**Investment involves risks. Please refer to the Hong Kong Prospectus for details including the risk factors.**

#### **Risk to Capital and Income (Investment Risk)**

- The assets of the fund are subject to fluctuations in value. There is no guarantee of repayment of principal and you may not get back the original amount invested. Past performance is no guarantee of future performance.

#### **Equities**

- The fund's investment in equities securities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events including changes in investment sentiment, political and economic conditions and issuer-specific factors.

#### **Multi-Asset**

- Multi-asset funds invest in multiple asset classes and are being subject to risks inherent in those individual asset classes. The overall risk depends on the correlation of returns between each asset class and could be adversely affected by a change in those correlations which could result in higher volatility and/or lower diversification.

#### **Bonds and other Debt Instruments**

- The value of bonds or other debt instruments will fluctuate depending on e.g. market interest rates, the credit quality of the issuer, the currency of the investment (when it is different from the base currency of the fund) and liquidity considerations. In general, the prices of debt instruments rise when interest rates fall, whilst their prices fall when interest rates rise.

#### **Downgrading risk**

- The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may or may not be able to dispose of the debt instruments that are being downgraded.

#### **Credit/Default Risk**

- Investments may be adversely affected if any of the institutions with which money is deposited suffers insolvency or are otherwise unable to pay interest or principal (default). Credit risk also arises from the uncertainty about the ultimate repayment of principal and interest from bond or other debt instrument investments. In both cases the entire deposit or purchase price of the debt instrument is at risk of loss if there is no recovery after default.

#### **Credit rating risk**

- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

#### **Valuation Risk**

- Valuation of the fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

#### **Risk relating to dynamic asset allocation strategy**

- The investments of the fund may be periodically rebalanced and therefore the fund may incur greater transaction costs than a fund with static allocation strategy.

#### **Income-producing securities**

- Although the fund will generally invest in income-producing securities, it is not guaranteed that all underlying investments will generate income. To the extent that underlying investments of the fund are income producing, higher yields generally mean that there will be (a) reduced potential for capital appreciation for equity securities; and (b) increased potential for capital appreciation and/or depreciation for fixed income securities.

#### **Emerging Markets**

- This fund invests in emerging market securities which may involve increased risks and special considerations not typically associated with the investment in securities in more developed markets. The price of these securities may be more volatile and/or less liquid than those of securities in more developed markets.
- This volatility or lack of liquidity may stem from political, economic, legal, taxation, settlement, transfer of securities, custody and currency/currency control factors.
- Although care is taken to understand and manage these risks, the fund and accordingly the shareholders in the fund will ultimately bear the risks associated with investing in these markets.

**Foreign Currency Risk**

- The fund’s assets may be denominated in currencies other than the base currency of the fund. Also, a class of shares may be designated in a currency other than the base currency of the fund. Fluctuations in the exchange rates between these currencies and the base currency as well as changes in exchange rate controls may adversely affect the fund’s net asset value.

**Financial Derivative Instruments**

- Although the fund will not make extensive use of derivatives for investment purposes or use complex derivatives or strategies to meet the investment objectives of the fund, the use of derivatives may give rise to liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk at times. The leverage element/component of a derivative can result in a loss significantly greater than the amount invested in the financial derivative instruments by the fund. Exposure to financial derivative instruments may lead to a high risk of significant loss by the fund.

**How has the fund performed?**

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A-USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding any subscription fees and redemption fees you might have to pay.
- Fund launch date: 2001
- Class A-USD launch date: 2001
- Class A-USD is selected as the most appropriate representative share class as it has the longest track record and is denominated in the fund’s reference currency.

**Is there any guarantee?**

This fund does not have any guarantees. You may not get back the full amount of money you invested.

**What are the fees and charges?**

**Charges which may be payable by you**

You have to pay the following fees when dealing in shares of the fund:

<b>Subscription Fee</b>	Class A – Up to 5.25% of NAV Class Y – 0%
<b>Switching Fee</b>	Generally up to 1% of NAV, except if you are switching from one class with no subscription fee into a class with subscription fee, you will have to pay for a switching fee of up to the full subscription fee of the class to be switched
<b>Redemption Fee</b>	N/A

**Ongoing fees payable by the fund**

The following expenses will have to be paid out of the fund. They affect you because they reduce the return you get on your investments:

<b>Management Fee*</b>	Class A – Up to 1.25% p.a. of NAV Class Y – Up to 0.70% p.a. of NAV
<b>Depository Fee</b>	Varies from 0.003% to 0.35% of NAV
<b>Performance Fee</b>	N/A
<b>Administration Fee</b>	Up to 0.35% of NAV

\* The management fee can be increased to a maximum annual rate of 2% of the net asset value of the fund. In the event of such increase, not less than 3 months’ notice will be given to you.

### Other Fees

You may have to pay other fees when dealing in shares of the fund. Any other fees and charges are described in the Hong Kong Prospectus. You should note that some fees may be increased, up to a specified permitted maximum, by giving shareholders at least one month's prior notice. For details, please refer to the Hong Kong Prospectus.

### Additional Information

- You generally buy, redeem or switch shares at the fund's next-determined net asset value after we receive your request, directly or via a distributor, in good order at or before 5.00 p.m. Hong Kong time, being the fund's dealing cut-off time. Before placing your orders, please check with your distributor for the distributor's internal dealing cut-off time (which may be earlier than the fund's dealing cut-off time).
- The net asset value of this fund is calculated and the price of shares is published each business day. Net asset value of the fund will be published in the South China Morning Post and the Hong Kong Economic Times.
- Investors may also obtain the past performance information of the fund's representative share class and (if applicable) other share classes offered to Hong Kong investors from [www.fidelity.com.hk](http://www.fidelity.com.hk).
- Investors may obtain information on the intermediaries from the Fidelity Investor Hotline: +852 2629 2629.
