	CAD1,500	CAD1,000,000
	NZD2,000	NZD1,200,000
Additional	-	-

What is this product?

Invesco Asia Balanced Fund (the "Fund") is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

Objectives and Investment Strategy

The primary objective of the Fund is to generate income from investment in Asia-Pacific equities and debt securities (excluding Japan). The Fund will also aim to provide long-term capital appreciation. The Fund will invest primarily (at least 70% of net asset value of the Fund) in a diversified portfolio of equities and debt securities in the Asia-Pacific region (excluding Japan). The allocation mix between equities and debt securities may vary according to the Investment Manager's discretion and market conditions. Included in this category are listed real estate investment trusts ("REITs") in Asia-Pacific ex Japan. Up to 30% of the net asset value of the Fund may be invested in aggregate in cash and cash equivalents, money market instruments, equity, equity related and debt securities issued by companies or other entities not meeting the above requirements. The Fund may invest up to 20% of its net asset value in contingent convertibles. The Fund will have a flexible approach to country allocation covering investments in the Asia-Pacific region including the Indian subcontinent and Australasia but excluding Japan.

Not more than 10% of the net asset value of the Fund may be invested in securities issued by or guaranteed by a country which is unrated and/or whose credit rating is below investment grade.

The Fund may invest up to 60% of its net asset value in debt securities which are unrated (debt securities which are not rated by any international rating agency such as Moody's, Standard & Poor's and Fitch) and/or whose credit rating is below investment grade (below investment grade is defined as credit rating that is below BBB- from Standard & Poor's and Fitch, or below Baa3 from Moody's or an equivalent rating from an internationally recognized rating agency).

The Fund may use derivatives (including but not limited to futures, forwards, non-deliverable forwards, swaps and complex options structures) for hedging and efficient portfolio management purposes. Such derivatives may also incorporate derivatives on derivatives (i.e. forward dated swaps, swap options). However, financial derivative instruments will not be extensively used for investment purposes (i.e. entering into financial derivative instruments to achieve the investment objectives).

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risks factors.

- **General investment risk** - There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- **Currency exchange risk**
 - The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these

currencies and the base currency and by changes in exchange rate controls.

- For the hedged share classes, there is no guarantee that the exposure of the currency in which the shares are denominated can be fully hedged at all times against the base currency of the Fund or the currency or currencies in which the assets of the Fund are denominated. Investors should also note that the successful implementation of the strategy may substantially reduce the benefit to shareholders in the relevant class of shares as a result of decreases in the value of the share class currency against the base currency of the Fund. In the event that investors request payment of redemption proceeds in a currency other than the currency in which the shares are denominated, the exposure of that currency to the currency in which the shares are denominated will not be hedged.
- **Volatility risk** - Investors should note that volatility in the Fund's investment portfolio may result in large fluctuations in the net asset value of the Fund which may adversely affect the net asset value per share of the Fund and investors may as a result suffer losses.
- **Equities risk** - The value of, and income derived from, equity securities held may fall as well as rise and the Fund may not recoup the original amount invested in such securities. The prices of and the income generated by equity securities may decline in response to certain events, including the activities and results of the issuer, general political, economic and market conditions, regional or global economic instability and currency and interest rate fluctuations. Thus, this may adversely impact the Fund and/or the interests of investors.
- **Credit risk**
 - Investment in bonds, debt or other fixed income securities (including corporate and sovereign bonds) are subject to the risk that issuers do not make payments on interest and principal of such securities. An issuer suffering from an adverse change in its financial condition could lower the quality of a security leading to greater price volatility on that security.
 - Securities which were investment grade at the time of acquisition may be downgraded. The risk of any such downgrading will vary over time. The Fund's investment policy does not specifically require the Fund to sell such securities if they should fall below investment grade. Besides, the Investment Manager and/or Investment Sub-Manager (if applicable) may not be able to dispose of the debt instruments that are being downgraded. Investments in below investment grade securities carry a higher risk of default and therefore may adversely impact the Fund and/or the interests of investors.
- **Risk of investing in high yield bonds/non-investment grade bonds and un-rated bonds** - The Fund may invest in high yield bonds/ non-investment grade bonds and un-rated bonds which involve substantial risk. High yield bonds/ non-investment grade bonds and un-rated bonds are regarded as being predominantly speculative as to the issuer's ability to make payments of principal and interest. Issuers of high yield bonds/ non-investment grade bonds and un-rated bonds may be highly leveraged, subject to lower liquidity and higher volatility and may not have available to them more traditional methods of financing. An economic recession may adversely affect an issuer's financial condition and the market value of high yield bonds/ non-investment grade bonds and un-rated bonds issued by such entity. High yield bonds/ non-investment grade bonds and un-rated bonds are generally subject to greater loss of principal and interest than high-rated bonds. As such, this may adversely impact the Fund and/or the interests of investors.
- **Interest rate risk** - The bonds or fixed income securities that the Fund invests in may fall in value if the interest rates change and this will adversely impact the net asset value of the Fund. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes.
- **Liquidity risk** - The Fund may be adversely affected by a decrease in market liquidity for the securities in which it invests where some of the Fund's securities may become illiquid and the Fund may experience difficulties in selling securities at a fair price within a timely manner.
- **Credit rating risk** - Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.
- **Concentration risk** - As the Fund will invest primarily in Asia-Pacific (excluding Japan) equities and debt securities, such concentration may exhibit a higher than usual degree of risk and the Fund may be subject to above average volatility. The diversification benefits that would ordinarily accrue from investment in a fund having a more diverse portfolio of investments, may not apply to this Fund.
- **Risk of investing in REITs**
 - The Fund does not invest directly in real estate and insofar as it directly invests in REITs, any dividend policy or dividend payout at the Fund level may not be representative of the dividend policy or dividend payout of the

relevant underlying REIT. The relevant underlying REIT may not necessarily be authorised by the CSSF and/or the Securities and Futures Commission ("SFC") in Hong Kong.

- Please note that the Fund is authorised under the SFC's Code on Unit Trusts and Mutual Funds and not under the SFC's Code on Real Estate Investment Trusts. CSSF and/or SFC authorisation does not imply official approval or recommendation.
- **Emerging markets risk** - The Fund invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets such as, liquidity risk, currency risks/ control, political and economic uncertainties, policy, legal or regulatory event affecting the relevant markets and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- **Contingent convertibles risk**
 - Contingent convertible bonds are a type of debt security, issued by a financial institution that may be converted into equity or could be forced to suffer a write down of principal upon the occurrence of a pre-determined trigger event. The trigger event is ordinarily linked to the financial position of the issuer. In stressed market conditions, the liquidity profile of the issuer can deteriorate significantly and a significant discount may be required in order to sell the contingent convertible bonds.
 - Contingent convertible bonds can carry higher risk than investment in traditional debt instruments/ convertibles and in certain cases equities since coupon payments may be discretionary and can be cancelled at any time for any reason.
 - Contingent convertible bonds can also be exposed to several other risks, including but not limited to trigger level risk, capital structure inversion risk, call extension risk, unknown/uncertainty risk and valuation risk.
- **Risk of investing in financial derivative instruments ("FDI") for efficient portfolio management and hedging purposes** - Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund.
- **Risks associated with payment of dividends and/or fees and expenses out of capital**
 - Payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per share in respect of such share class after the monthly distribution date.
 - For Monthly Distribution-1 share classes that are currency hedged, the Fund may take into account the return driven by the interest rate differential between the currency in which the hedged Monthly Distribution-1 share class is denominated and the base currency of the Fund in determining the distribution to be paid. Investors should be aware that the uncertainty of relative interest rates which will have an impact on the return of the hedged Monthly Distribution-1 share class. The net asset value of the Monthly Distribution-1 hedged share class may fluctuate and may significantly differ from other share class due to the fluctuation of the interest rate differential between the currency in which the hedged Monthly Distribution-1 share class is denominated and the base currency of the Fund, and may result in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share class. Investors in such share class may therefore be adversely affected.
- **Dynamic Asset Allocation Risk** - The Investment Manager has wide discretion to allocate dynamically within an asset class or between different asset classes. The allocation of investments between different asset classes or between segments of the same asset class may have a significant effect on the Fund's performance. The Fund could miss attractive investment opportunities by having underweight exposure in markets that subsequently experience significant returns and could lose value by being overweight in markets that subsequently experience significant declines. As a result, the relevance of the risks associated with investing in each asset class (or segment of the same asset class) will fluctuate over time. This may result in possible substantial and sudden changes to the Fund's risk profile. In addition, the periodic allocation or rebalancing of investments may incur greater transaction costs than a fund with static allocation strategy.

How has the Fund performed?

- The Fund Manager views Class A quarterly distribution - USD (the "Share Class"), being the focus share class of the Fund available to the public of Hong Kong, as the most appropriate representative unit class.
- Fund launch date: 31 October 2008.
- Share Class launch date: 31 October 2008.
- The base currency of the Fund is USD.
- Past performance of the Share Class is calculated in USD.
- Performance is calculated after deduction of ongoing charges and is inclusive of gross income reinvested. Any entry/exit charges shown are excluded from the calculation.
- Past performance is not a guide to future performance.
- Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Share Class increased or decreased in value during the calendar year being shown.
- Where no past performance is shown, there was insufficient data available in that year to provide performance.

Is there any guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

You may have to pay other fees when dealing in the shares of the Fund.

Additional Information

- The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Hong Kong Sub-Distributor and Representative, Invesco Asset Management Asia Limited, on request and at www.invesco.com.hk. This website has not been reviewed by the SFC.
- You generally buy and redeem shares at the Fund's next-determined net asset value after the Hong Kong Sub-Distributor and Representative, Invesco Asset Management Asia Limited, receives your request in good order on or before 5:00pm, Hong Kong time, being the Fund's dealing cut-off time. Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal cut-off time (which may be earlier than the Fund's dealing cut-off time).
- The net asset value of the Fund is calculated each "Business Day" as defined in the Prospectus and the price of shares is published each Hong Kong business day (i.e. a day on which banks in Hong Kong are open for normal banking business) at www.invesco.com.hk. This website has not been reviewed by the SFC.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors at www.invesco.com.hk. This website has not been reviewed by the SFC.
- Investors may obtain other information of this product at www.invesco.com.hk. This website has not been reviewed by the SFC.
