Appendix III – Global exposure and leverage (Unaudited)

Method used to calculate global exposure

The following sections indicate whether the UCITS global exposure is managed under a commitment approach, a relative Value at Risk (relative VaR) approach or an absolute Value at Risk (absolute VaR) approach.

For funds managed under a VaR approach, additional information is provided on the VaR model, the VaR benchmark, the regulatory VaR limit usage and the level of leverage reached.

1. Commitment approach

The approach used for the funds with low derivative usage or funds which limit their derivatives commitment to 100% or less of their Net Asset Value.

Appendix III – Global exposure and leverage (Unaudited) (cont)

Information on the VaR limit usage & level of leverage

The level of leverage is an indication of the derivative usage and of any leverage generated by the reinvestment of cash received as collateral when using efficient portfolio management techniques. It does not take into account other physical assets directly held in the portfolio of the relevant Funds. The figure is not representative of the maximum amount that a fund could lose, as it includes the derivatives used to protect the Net Asset Value of a fund as well as the derivatives backed by risk free assets and derivatives which do not generate any incremental exposure, leverage or market risk from an economic perspective. The reported leverage figure is therefore not a true representation of the economic leverage¹ in the fund. The level of leverage disclosed is based on the total notional value² of all financial derivative instruments held by a fund and is expressed as a percentage of fund's Net Asset Value. For the purpose of this calculation the holdings and offset derivative positions ('long' and 'short' positions) do not cancel each other out and the figure is a sum of the total holdings (except for forwards used for currency hedging purposes).

Sub-Fund	Regulation VaR limit utilisation			
	Lowest	Highest	Average	Average leverage

Appendix IV – Securities Financing Transactions (Unaudited)

The Sub-Funds engage in Securities Financing Transactions (SFT) (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation, the Sub-Funds' involvement relating to their exposure on total return swaps for the year ended 31 December 2018 is detailed below:

Schroder ISF QEP Global Value Plus

Global Data

Amount of assets engaged in total return swaps

Amount of Assets - Long Positions USD	% of AUM
38,145,180	63.34%
Amount of Assets - Short Positions USD	% of AUM
29,382,528	48.79%
Amount of Assets - Total USD	% of AUM
67,527,708	112.13%

Concentration Data

Ten largest collateral issuers (across all SFT and total return swaps)

As at 31 December 2018, there are no collateral securities and commodities received in respect of total return swaps.

Top ten counterparties

Counterparty	Gross Volume of Outstanding Transactions USD
HSBC Bank plc	15,344,489
UBS AG London	52,183,219

The Sub-Fund only deals with two counterparties for its total return swaps.

Aggregate Transaction Data

Type and quality of collateral

As at 31 December 2018, no collateral was received in respect of total return swaps.

Maturity tenor of collateral

As at 31 December 2018, no collateral was received in respect of total return swaps.

Currency of collateral

As at 31 December 2018, no collateral was received in respect of total return swaps.

Maturity tenor of total return swaps

Maturity	Long Positions USD	Short Positions USD	Total USD
less than 1 day	-	-	-
1 to 7 days	-	-	-
1 to 4 weeks	-	-	-
1 to 3 months	-	-	-

Cost

The costs attributed to total return swaps held during the year were included in the spread.

Appendix V – Remuneration Disclosure

UCITS remuneration disclosures for Schroder Investment Management Luxembourg S.A. (SIM Europe) for the year to 31 December 2017

These disclosures form part of the non-audited section of this annual report and accounts and should be read in conjunction with the Schroders plc Remuneration Report on pages 62 to 90 of the 2017 Annual Report & Accounts (available on the Group's website – www.schroders.com/ir), which provides more information on the activities of our Remuneration Committee and our remuneration principles and policies.

The UCITS Material Risk Takers ('UCITS MRTs') of SIM Europe are individuals whose roles within the Schroders Group can materially affect the risk of SIM Europe or any UCITS fund that it manages. These roles are identified in line with the requirements of the UCITS Directive and guidance issued by the European Securities and Markets Authority.

The Remuneration Committee of Schroders plc has established a remuneration policy to ensure the requirements of the UCITS Directive are met for all UCITS MRTs. The Remuneration Committee and the Board of Schroders plc review remuneration strategy at least annually. The directors of SIM Europe are responsible for the adoption of the remuneration policy, for reviewing its general principles at least annually, for overseeing its implementation and for ensuring compliance with relevant local legislation and regulation. During 2017 the Remuneration Policy was reviewed and changes were made to ensure compliance with the UCITS/AIFMD remuneration requirements.

The implementation of the remuneration policy is, at least annually, subject to independent internal review for compliance with the policies and procedures for remuneration adopted by the Board of SIM Europe and the Remuneration Committee. The most recent review found no fundamental issues but resulted in a range of more minor recommendations, principally improvements to process and policy documentation.

The total spend on remuneration is determined based on a profit share ratio, measuring variable remuneration charge against pre-bonus profit, and from a total compensation ratio, measuring total remuneration expense against net income. This ensures that the interests of employees are aligned with Schroders financial performance. In determining the remuneration spend each year, the underlying strength and sustainability of the business is taken into account, along with reports on risk, legal and compliance matters from the heads of those areas.

The remuneration data that follows reflects amounts paid in respect of performance during 2017.

- The total amount of remuneration paid by SIM Europe to its 259 staff was €27.5 million of which €21.2 was fixed remuneration (e.g. salaries, benefits in kind) and €6.3 was variable remuneration (e.g. annual bonus awards or deferred bonus awards). Employees of other Schroders Group entities who serve as Directors of SIM Europe receive no additional fees in respect of their role on the Board of SIM Europe.
- The following disclosures relate to UCITS MRTs of SIM Europe. Most of those UCITS MRTs were employed by and provided services to other Schroders group companies and clients. As a result, only a portion of remuneration for those individuals is included in the aggregate remuneration figures that follow, based on an objective apportionment to reflect the balance of each role using relevant regulated AUM as a proportion of the total AUM within the scope of each role. The aggregate total remuneration paid to the 174 UCITS MRTs of SIM Europe in respect of the financial year ended 31 December 2017, and attributed to SIM Europe or the UCITS funds that it manages, is €33.6 million, of which €8.2 million was paid to senior management, €21.3 million was paid to MRTs deemed to be taking risk on behalf of SIM Europe or the UCITS funds that it manages and €4.1 million was paid to other UCITS MRTs.

For additional qualitative information on remuneration policies and practices see www.schroders.com/rem-disclosures.
