Schroder International Selection Fund Emerging Markets Debt Absolute Return

A Accumulation USD | Data as at 31.10.2019

Important Information

The fund invests primarily in fixed and floating rate securities in emerging markets. The fund aims to achieve absolute performance but absolute return is not guaranteed.

- The fund invests in debt securities which may be subject to interest rate, credit and counterparty risks.
 - The fund may invest in emerging markets which are subject to political and economic, legal and regulatory, market and settlement, execution and counterparty and currency risks.
 - The fund may invest more than 10% of its net assets in securities issued by unrated or below investment grade sovereign government. Such investment may have greater market and credit risks than higher rated sovereign securities.
 - The fund may use derivatives to meet its investment objective but does not intend to use derivatives extensively for investment purposes. Derivatives exposure may involve higher counterparty, liquidity and valuation risks. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.
 - For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.
- You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

Investment Objectives

The fund aims to provide an absolute return of capital growth and income by investing in fixed and floating rate securities in emerging markets. Absolute return means the fund seeks to provide a positive return over a 12 month period in all market conditions, but this cannot be guaranteed and your capital is at risk.
