

### Important Information

The fund invests primarily in equity and equity related securities of Brazilian, Russian, Indian and Chinese companies.

•The fund may invest in emerging markets which are subject to political and economic, legal and regulatory, market and settlement, execution and counterparty and currency risks. It is also exposed to the risks specific to the China market.

•The fund may use derivatives to meet its investment objective but does not intend to use derivatives extensively for investment purposes. Derivatives exposure may involve higher counterparty, liquidity and valuation risks. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.

•For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.

You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

### Investment Objectives

The fund aims to provide capital growth by investing in equity and equity related securities of Brazilian, Russian, Indian and Chinese companies.
