What is this product?

BEA Union Investment Hong Kong Dollar (HK\$) Bond Fund (the "Investment Fund") is a sub-fund of BEA Union Investment Capital Growth Fund (the "Fund"), which is a unit trust established as an umbrella fund under the laws of Hong Kong.

Objective and Investment Strategy

Objective

The investment objective of the Investment Fund is to provide investors with long-term capital growth in Hong Kong dollar terms through investing in a portfolio consisting primarily of Hong Kong dollar denominated interest bearing securities. If the Manager considers that conditions so require and it is in the interests of Unitholders to do so, a substantial portion of the portfolio may be held in cash.

Strategy

The Manager anticipates that a majority of the portfolio will be invested in bonds issued by governments, quasi-governmental organisations, multilateral international agencies and blue chip corporations. Investments in corporate bonds and debentures must meet the minimum required credit ratings as determined by the Mandatory Provident Fund Schemes Authority from time to time. The value of the portfolio's holding of Hong Kong dollar denominated securities shall not be less than 70% of the net asset value of the Investment Fund.

The Manager may acquire financial futures contracts for the Investment Fund for hedging purposes to protect and enhance asset value, consistent with the investment objective of the Investment Fund.

In addition, at least 30% of the assets of the Investment will be held in Hong Kong dollar currency investments as measured by effective currency exposure (determined in accordance with Schedule 1 of the Mandatory Provident Fund Schemes (General) Regulation).

The Manager expects the return of the Investment Fund over the long-term to exceed the Hong Kong inflation rate.

What are the key risks?

Investment involves risks. Please refer to the Explanatory Memorandum for details including the risk factors.

1. Investment risk

- The Investment Fund is an investment fund. The Investment Fund's investment portfolio may fall in value and therefore your investment in the Investment Fund may suffer losses.

2. Diversification risk

- The Investment Fund invests in the Hong Kong market only. Although the Investment Fund's portfolio will be diversified in terms of the number of holdings, the Investment Fund's asset value is likely to be more volatile than a broad-based fund, such as a global or regional fund, as it is more susceptible to fluctuations in value resulting from adverse conditions in Hong Kong.

3. Interest rates risk

- Interest rates may be subject to fluctuation. Any fluctuation in interest rates may have a direct effect on the income received by the Investment Fund and its capital value.

4. Credit risk

- There is no certainty in the credit worthiness of issuers of debt securities. If the issuers of the debt securities in which the assets of the Investment Fund are invested defaults, the performance of the Investment Fund will be negatively affected.
- Further, the value of the Investment Fund may be adversely affected if any of the institutions with which cash is invested or deposited suffers insolvency or other financial difficulties.

5. Risk in relation to financial futures contracts

- The Investment Fund may use financial futures contracts for hedging purposes. Such hedging may not achieve the intended purpose. In an adverse situation, the Investment Fund's use of financial futures contracts may become ineffective in achieving hedging and the Investment Fund may suffer significant losses.
